Medical
Wahro
Cop. 1

SUBJECT INDEX

ABDOMEN, Incomplete indirect inguinal hernias; 2,462 hernias and 2,337 hernia repairs, 42; late complications of war wounds of, 55; method of administering continuous intravenous anesthesia for surgery of, 90; fallacy of conjoined tendon; etiology and repair of inguinal hernia, 145; intraperitoneal use of hypertonic glucose solution, 159; early rising after operations on pelvis and, 192; experience at casualty clearing station; operative procedure; wounds of chest and, wounds of head and eyes; burns; anesthesia, 195; direct inguinal hernias; study of 605 hernias and of 565 repairs, 247; fascial repair of inguinal hernias, 248; surgical management of femoral hernia and late results, 248; femoral hernias; study of 238 hernias and 226 repairs, 249; neoplasms of, of neurogenic origin, 258; recurrent inguinal hernias; study of 282 hernias and of 268 repairs, 346; perforating gunshot wounds of, 354; syndrome of pain in, and infectious purpura in girl of thirteen, 471; spread of acute intraperitoneal effusions, 472; general lymphadenopathy of, non-specific mesenteric adenitis, 473; value of roentgen diagnosis in acute diseases of, 506; some factors in lowered mortality rate for acute appendicitis; analysis of 2,013 consecutive cases, 561; primary appendical abscesses, 561; chemotherapy of actinomycosis of, 566

Abscess, Portal pyemia following acute appendicitis; case of multiple, of liver with recovery, 46; brain, collective review, 118; treatment of, of lungs, 238; lung, 335; surgical treatment of pulmonary, 336; roentgen examination of brain, 437; extrapleural, 453; anatomicopathological studies of retropharyngeal (peripharyngeal), 545; sphenotemporal lobe, analysis of little known clinical symptoms, 547; pulmonary, following mega-esophagus, operated in one stage after creation of artificial pleural symphysis; cure, 556; primary appendical, 561. *See also* names of organs

Achalasia, Surgical considerations of, review of literature and report of 3 cases, 241; conservative treatment of, 555

Actinomycosis, Specific diagnosis and therapy of, 414; of central nervous system; 2 cases, 437; chemotherapy of abdominal, 566; sulfanilamide in, 600

Adamantinomas, Pathogeny and therapy of, new surgical procedure, 541

Addison's disease, Effects of desoxycorticosterone acetate, corticosterone, and cortical extract on, 268

Adenitis, General abdominal lymphadenopathy, with reference to non-specific mesenteric, 473

Adenocarcinoma, Mixed, and squamous-cell carcinoma of uterus, 57; primary, of appendix and carcinoid tumors, 350

Adenoma, Of islets of Langerhans with hyperinsulinism, associated with, of thyroid, 54; 3 cases of hyperinsulinism with hypoglycemia treated by removal of, from pancreas, 157; primary pituitary, and syndrome of cavernous sinus; clinical and anatomical study, 439

Adenomyosarcoma of kidney (Wilms tumor); 3 cases, 170

Adrenal glands, Traumatic shock; surgery and basic sciences, 1; diseases of, 64; effect of fresh and experimentally modified anterior lobe of hypophysis of cattle on mitotic activity in cortex of, of guinea pig, 101; effects of desoxycorticosterone acetate, corticosterone, and cortical extract on Addison's disease, 268; relation of endocrine function to resistance and immunity; changes in complement and response to vaccinia following alterations in function of thyroid, pituitary, and, in rabbit and dog, 311; pheochromocytoma of, with paroxysmal hypertension; case relieved by surgery, 478

Adrenaline, Action of ephedrine and, in acute pancreatitis 565

Adrenocortical extract, Reduction of mortality from experimental traumatic shock with, 84

Africa, Primary carcinoma of liver in Bantu races of South, 157; clinical features of primary carcinoma of liver in Bantu races of South, 470

Air, Operative and postoperative infections, bacterial contamination borne by, 88; sterilization of, in operating room with bactericidal radiation; results from November 1, 1938, to November 1, 1939; safety of patients and personnel, 192

Aluminum hydroxide, Treatment of massive gastroduodenal hemorrhage by continuous administration of colloidal; 144 cases, 557

Alveolus, Double radium-mold treatment of carcinoma of floor of mouth and lower, 306

Amebiasis, Of skin; etiology of so-called postoperatively progressing gangrene of skin, 515; of the skin, 611

American Journal of Obstetrics and Gynecology, Advances and innovations in fields of obstetrics and gynecology during past twenty years, 160

Amino-acids, Parenteral replacement of protein with, of hydrolyzed casein, 193

Amputation, Of lower extremity, 187; experiences with Pirogow, of foot, 286

Amyloidosis induced by tumors of kidney, 66

Anaphylaxis, Effects of ether anesthesia on, 90

Anastomosis, Soluble rod as aid to vascular, experimental study, 289

Androgens, Evaluation of colorimetric and biological method for determining urinary, 102; evaluation of therapy with, in gynecological practice, 164; excretion of estrogenic substances and, in urine of women; investigation of 14 healthy women, 10 cases of myoma, and 2 of castration, 165; treatment of chronic mastitis; definitions, effects of pregnancy, estrogens, diathermy, and, summary and conclusions, 236; urinary excretion of, by patients with benign hypertrophy of prostate, 375

Anesthesia, Factors influencing choice of anesthetic agent and some suggestions on anesthetic technique, 89; effects of ether, on anaphylaxis, 90; method of administering continuous intravenous, for abdominal surgery, 90; segmental peridural, 91; neurogenic dysfunction of bladder due to spinal, 92; pathological considerations relating to early diagnosis and curative surgical treatment of carcinoma of esophagus; principles of surgical practice, 105; experience at casualty clearing station; operative procedure; wounds of chest and abdomen; wounds of head and eyes; burns, and, 195; technique for general, in surgery of mouth, 197; in thoracic surgery, 198; local, and treatment of war injuries, 298; use of retrobulbar proctocaine, for relief of intractable ocular pain, 324; paravertebral procaine block in treatment of postoperative atelectasis, 402; in chest injuries; physiology, anesthetic methods, intratracheal insufflation, choice of anesthetic agent, administration, conduction of, and oxygen therapy, 407; non-oxidizing epinephrine to prolong spinal, with subarachnoid capacity control, 407; war tetanus (14 cases observed at Centre Sanitaire Français of Besançon);

action of injections of sympathetics for, 503; further studies with ethyl normal propyl ether, 503; safety factors in surgery of biliary tract; principles of surgical practice, 521; modern, 601; in orthopedic surgery, 602
Anesthetic, Factors influencing choice of, and suggestions on technique of anesthesia, 89
Anesthetist, Anoxia; point of view of, 504
Aneurysm, Of ductus arteriosus, its importance to thoracic surgeon; 2 cases, 143; experimental studies on gradual occlusion of large arteries, 287; vascular surgery under war conditions, 404
Angina, Ludwig's, 10
Ankle, Dislocations and fracture-dislocations of talus, 184; end-results and treatment of tuberculous disease of, and tarsus, 185
Anoxia, Effects of repeated, on brain, 330; chemical pathology of burns, collective review, 390; anesthetist's point of view, 504
Anthrax of kidney; 2 new personal observations, 269
Antitoxin, Reactions to toxin in experimental tetanus, 103
Anuria due to sulfapyridine calculi, 411
Anus, Sphincter of, plastic operation for partial incontinence, 152; surgical treatment of fistulas of rectum and, 153; pruritus of; etiological factors and treatment in 100 cases, 351
Aorta, Resection of aorto-iliac junction with double lumbar sympathectomy in treatment of arteritic thrombosis of, 386
Apoplexy, Principles of treatment of uteroplacental, 476
Appendicitis, With complications; reduction in mortality due to use of continuous gastro-intestinal decompression, 45; portal pyemia following acute, case of multiple liver abscesses with recovery, 46; acute, in children, 150; some factors in lowered mortality rate for acute, analysis of 2,013 consecutive cases, 561
Appendix, Treatment of appendical peritonitis, 150; primary adenocarcinoma of, and carcinoid tumors, 350
Appendix testis, Torsion of, 376
Arm, Nature and cause of swelling of upper limb after radical mastectomy, 334; treatment of complete fractures of both bones of forearm, 382; problem of producing complete and lasting sympathetic denervation of upper extremity by preganglionic section, 443; conservative treatment of fractures of humerus, 491; fractures of shaft of radius and ulna, 491; fractures of lower end of radius (Colles), 491; surgical approach to proximal end of radius and its use in fractures of head and neck of radius, 591; pain of cyclothymic states; case with brachial pain, 611
Arteries, Experimental studies on gradual occlusion of large, 287; clinical and experimental observations on arteriovenous fistulas, 287; prevention of ischemic gangrene following surgical operations upon major peripheral, by chemical section of cervicodorsal and lumbar sympathetics, 385; resection of aorto-iliac junction with double lumbar sympathectomy in treatment of thrombosis of aorta, 386; peripheral embolism of, 598
Arteriography, Experimental studies on cerebral, 438
Artery, Variations in origin and course of hepatic, and its branches, 155; tumor embolism of common femoral, treated by embolectomy and heparin, 288; experiences in surgical treatment of subacute streptococcus viridans endarteritis complicating patent ductus arteriosus, 337
Arthritis, X-ray diagnosis in chronic, 303; late results of gonorrheal, 595. *See also* names of joints
Arthritis deformans, Changes in bones and joints resulting from interruption of circulation; non-traumatic lesions in adults with bone infarction, 484; operative treatment of certain types of, of hip joint; critical discussion of problem of drilling femoral head and arthrodesis, 490
Arthroplasty, Vitallium-cap, of metacarpophalangeal and interphalangeal joints of fingers, 279
Arthrosis deformans, "Uncovertebral joints" and uncovertebral, pathologico-anatomical and roentgenological study, 487
Ascorbic acid, Parallel investigations into, (Vitamin C) content in blood plasma and into strength of cutaneous capillaries in healthy children, 79
Atelectasis, Paravertebral procaine block in treatment of postoperative, 402
Atresia, Congenital, of esophagus; study of 32 cases, 242
Aviation, Pilot fitness, safety factor in, 431
Azotemia and hypochloremia in peritonitis, 347

BACK, Care of, following spinal-cord injuries, 233
Bacteria, Defensive rôle of peritoneum and omentum in fight against, rôle of trauma in development of peritonitis, 247; development of, in human stomach and its surgical significance, 348; control of air-borne infection in air-raid shelters and elsewhere; bacteriological technique, organisms in coarse droplets, organisms in droplet nuclei, bactericidal mists, how and when to spray, organisms on dust, 502
Bacteriemia, Sulfathiazole therapy of staphylococcus aureus, 406
Beth-Vincent test, Determination of blood groups, and its errors, and simple method with absolute security, 387
Bifurcation operation, 279
Bile duct, Stricture of common duct following cholecystectomy, 52; carcinoma of extrahepatic, 52; surgical management of usual extrahepatic biliary lesions, 53; postoperative perfusion of system of, 257; physiological sphincter of hepatic, 471; exploration of common, for stone; drainage with T-tube and cholangiography, 564
Biliary tract, Surgical management of usual extrahepatic biliary lesions, 53; operative anastomoses between biliary and gastro-intestinal tract and, review of earlier literature and clinical study of 809 Swedish cases, 154; some aspects of liver; surgery and basic sciences, 209; postoperative perfusion of, ductal system, 257; drainage following cholecystectomy, 352; postcholecystectomy syndrome, 353; functional insufficiency of sphincter of Oddi, 354; anatomicofunctional disturbances of sphincter of Oddi, 354; physiological sphincter of hepatic bile duct, 471; safety factors in surgery of; principles of surgical practice, 521; study of normal and pathological physiology of, 563
Bilirubin, Method of determining amount of, in blood; total, direct, and indirect; reaction of Ehrlich-Proescher and photometer of Pulfrich, 208
Biophotometer, Clinical studies on Vitamin A deficiency; and adaptometer (Hecht) studies on normal adults and on persons in whom attempt was made to produce Vitamin A deficiency, 308
Biopsy, Symposium on carcinoma of lung, 455
Bladder, Irrigation and tidal drainage, 67; neurogenic dysfunction of, due to spinal anesthesia, 92; congenital hour-glass, 170; contracture of, elastosis of, 171; operative technique in treatment of diverticula of, 171; treatment of infiltrating tumors of, 172; advances in roentgen-ray treatment of tumors of, 206; case of intraligamentary, complicating retrocervical fibromyoma, 261; diverticulectomy of, 271; vesicovaginal fistulas in women, 474; suprapubic transvesical repair of vesicovaginal fistulas, 567
Blood, Traumatic shock; surgery and basic sciences, 1; parallel investigations into ascorbic acid (Vitamin C)

content in plasma of, and into strength of cutaneous capillaries in healthy children, 79; studies on stored, oxygen capacity of stored, 80; erythrocytic-sedimentation reaction in cases of embolism, thrombosis, and cerebral hemorrhage, as well as in some other vascular diseases, 85; prothrombin studies; maintenance of constant concentration of prothrombin in normal persons, 96; clinical investigations of some factors causing prothrombin deficiencies; significance of liver in their production and correction, 96; metabolism of Vitamin K and rôle of liver in production of prothrombin in animals, 96; use of artificially produced radio-active elements as tagged atoms in biological research, 103; thrombopenia in idiopathic purpura hemorrhagica, 189; studies on preservation of human, 189; preserved human, reactions from transfusion, 190; stored, leucocytes in stored, 190; potassium and phosphate content of plasma from stored, experiments on amount of hemolysis, changes in potassium, change in plasma inorganic phosphate, use of plasma in transfusions, and preservation of plasma after separation, 191; method of determining amount of bilirubin in, total, direct, and indirect; reaction of Ehrlich-Proescher and photometer of Pulfrich, 208; studies in preservation of, 289; changes occurring in, stored in different preservatives, 290; structure of, in relation to surgical problems, 292; hemostasis, 308; pathogenesis of traumatic shock; oxidative coefficient of urine and, in experimental traumatic shock, 309; traumatic hemothorax; response of pleura to; treatment; infected hemothorax and foreign bodies; reëxpansion of lung, 335; determination of groups of, Beth-Vincent test and its errors, and simple method that gives absolute security, 387; chemical pathology of burns; collective review, 390; value of picture of, in surgery, 401; differential leucocyte count, 415; recent studies of factors involved in coagulation of, including review of Vitamin K; surgery and basic sciences, 417; survival of stored red cells after transfusion, 496; survival of stored, after transfusion, 496; substitutes for, in treatment of acute hemorrhage; experimental evaluation; standard conditions, control experiments, plasma and serum, clinical application, 497; concentration and drying of plasma, 497; transfusion of reconstituted dried human serum, 497; prothrombin adsorption of prothrombin; calculation of concentration, 516; technique of preserving, 598

Blood pressure, Use of neosynephrin hydrochloride in maintaining, during spinal anesthesia, 199; chronic bilateral pyelonephritis and hypertension, 269; bilateral supradiaphragmatic section of splanchnic nerves in surgical treatment of high, 443; pheochromocytoma of adrenal with paroxysmal hypertension; case relieved by surgery, 478

Blood transfusion, Studies on stored blood; oxygen capacity of stored blood, 80; of unheated blood, 189; preservation of human blood, 189; preserved human blood; reactions from, 190; stored blood; leucocytes in stored blood, 190; potassium and phosphate content of plasma from stored blood; experiments on amount of hemolysis, changes in potassium, change in plasma inorganic phosphate, use of plasma in, and preservation of plasma after separation, 191; blood preservation, 289; changes occurring in blood stored in different preservatives, 290; human serum transfusion, 290; preparation and use of human serum for, in shock, 291; plasma transfusion in experimental intestinal obstruction, 312; with employment of vetren and of infusor, 387; experimental study concerning, on field of battle, 388; survival of stored red cells after, 496; survival of stored blood after, 496; of reconstituted dried human serum, 497; surgical experiences with B.E.F., 500; shock and, 515; technique of preserving blood, 598

Blood vessels, Traumatic shock; surgery and basic sciences, 1; vascular changes after intravenous injection of thorium dioxide (thorotrast), 78; surgical treatment of varicose veins, 78; anatomical and physiological effects of arteriovenous fistula, 79; ligation of femoral and subclavian veins as method of treatment of gangrene of extremities, 79; dysphagia with disorders of heart and great, 144; variations in origin and course of hepatic artery and its branches, 155; experimental research on fat embolism, 207; bleeding esophageal varices; evaluation of methods directed toward their control, especially by direct injection of sclerosing solution, 242; ligation and thrombosis of veins of large intestines, 255; ischemic contracture of lower extremity, 285; experimental studies on gradual occlusion of large arteries, 287; clinical and experimental observations on arteriovenous fistulas, 287; tumor embolism of common femoral artery treated by embolectomy and heparin, 288; soluble rod as aid to vascular anastomosis; experimental study, 289; prevention and roentgen therapy of thromboses, 294; treatment of acute frost injuries, 294; five years' experience with radium treatment of hemangioma, results, and appraisal, 305; effect of stimuli on caliber of retinal, 326; prevention of ischemic gangrene following surgical operations upon major peripheral arteries by chemical section of cervicodorsal and lumbar sympathetics, 385; vascular surgery under war conditions, 404; latent phlebitis as cause of gangrene, 495; venographic study of thrombo-embolic problems, 495; postoperative thrombosis and embolism, 499; prevention and treatment of distant thromboses by elastic adhesive bandages, 499; radium treatment of vascular nevi, 513; mechanism of pyelovenous reflux; investigation and results, 585; peripheral arterial embolism, 598

Body build of male ulcer patient, 43

Bone, Osteoid-osteoma; experience with this benign tumor of, cases showing lesion in relation to shaft cortices and commonly misclassified as instances of sclerosing nonsuppurative osteomyelitis or cortical abscess of, 68; giant-cell tumors of, 68; experimental studies on osteogenesis and biochemistry of fracture callus, 76; discussion of methods of treatment of acute hematogenous osteomyelitis, 175; treatment of osteogenic sarcoma, 277; histological studies of operated fractures of femoral neck; phenomena occurring in, and cartilage following necrosis of, 283; roentgen findings in Caisson disease of, with case reports, 303; normal angles of, and roentgen report, 303; treatment, complications, and late results of acute hematogenous osteomyelitis, 404; therapy in acute osteomyelitis of frontal, 429; primary malignant tumors of temporal, report of case, 430; solitary myeloma of, roentgenological features, 4 additional cases, 484; recurrence of infection after elective operations in cases of healed suppuration in, and joints, 486; fractures of apparently healthy, without true accident, 491; tuberculous foci in, 590; multiple myeloma, 590; some orthopedic relationships of neurofibromatosis, 596

Bones, Tuberculosis of large long, of extremities, 69; changes in, and joints resulting from interruption of circulation; general considerations and changes resulting from injuries, 175; gunshot fractures of long, in vicinity of joints, 381; treatment of complete fractures of both, of forearm, 382; changes in, and joints resulting from interruption of circulation; non-traumatic lesions in adults with bone infarction; arthritis deformans, 484

Brain, Diseases of pituitary gland, 15; abscess of, collective review, 118; management of acute craniocerebral injuries, 139; subdural hemorrhage in patients with mental disease, 139; disturbances of function of ear after concussion of, 226; proposal for more radical treatment of gunshot wounds of, 231; cerebellar subdural hematoma in infant two weeks old with secondary hydrocephalus, 232; colloid cyst of foramen of Monro, successfully treated by operation, 232; effect of iodized oil on meninges of spinal cord and, 305; effects of repeated anoxia on, 330; method for removal of areas of, following freezing *in situ*, 330; skull injuries caused by projectiles and craniocerebral wounds, 428; visual-field defects associated with cerebellar tumors, 432; head injuries, 437; actinomycosis of central nervous system; 2 cases, 437; roentgen examination of abscesses of, 437; experimental studies on cerebral arteriography, 438; postoperative conditions of lowered intracranial pressure in operations on, contribution to pathological physiology of cerebrospinal fluid system, 441; extradural hemorrhage, 547; sphenotemporal lobe abscess with analysis of little known clinical symptoms, 547; section of spinothalamic tract in medulla with observations on pathway for pain, 547; roentgenological investigations on intracranial subdural space with view to revealing presence of subdural adhesions, 605

Breast, Plea for more local operation in early carcinoma of, 141; treatment of chronic mastitis; definitions—effects of pregnancy, estrogens, androgens, diathermy—summary and conclusions, 236; tumors of male, 236; pre-operative irradiation in carcinoma of, histological study, 305; consideration of recent additions to clinical and experimental knowledge of conditions of, 333; contribution to subject of roentgen treatment of early mastitis in puerperium, 333; nature and cause of swelling of upper limb after radical mastectomy, 334; preoperative radiotherapy of cancer of, 454; mastopathies and benign tumors of, treatment, 550; cancer of, 550; treatment of advanced and recurrent carcinoma of, 550

Bronchopneumonia, Aspiration, with reference to aspiration of stomach content, 85

Bronchoscope, Symposium on carcinoma of lung, 455

Bronchospirography, Description of catheter and technique of intubation, 237; application to collapse therapy, 238

Bronchus, Carcinoma of; investigation into incidence and pathological features of 131 cases from Glasgow Royal Infirmary, 141

Bunion, Clinical study of 100 patients subjected to simple exostosectomy for relief of pain of, 180; dorsal, its mechanics and operative correction, 181

Burns, Experience in treatment of war, 86; experience at casualty clearing station; operative procedure; wounds of chest and abdomen; wounds of head and eyes; and, anesthesia, 195; chemical pathology of, collective review, 390

CAISSON disease, Roentgen findings in, of bone, with case reports, 303

Calcaneus, Review of 111 cases of fracture of, with reference to injury of talocalcaneal joint, 492; results of treatment in more severe fractures of, 493

Calcification, Nature of, with reference to those in spleen, 94

Calcium, Metabolism of phosphorus, nitrogen and, in women during second half of pregnancy and in early lactation, 364; recent studies of factors involved in coagulation of blood, including review of Vitamin K; surgery and basic sciences, 417

Calculus, Anuria due to sulfapyridine, 411; of kidney and analysis, 483; exploration of common bile duct for, drainage with T-tube and cholangiography, 564; concrements from urinary tract, 589

Caldwell lecture, Of 1939; roentgenology of pancreatic disease, 301

Callus, Experimental studies on osteogenesis and biochemistry of fracture, 76

Cancer, Diagnosis and treatment of gastric lesions, 43; etiological and pathological factors in, of large bowel, 49; regional lymphatic metastasis of, of rectum, 50; carcinoma of extrahepatic bile ducts, 52; mixed adenocarcinoma and squamous-cell, of uterus, 57; myoma and, of corpus, 57; primary, of fallopian tube, 59; pathological considerations relating to early diagnosis and curative surgical treatment of, of esophagus; principles of surgical practice, 105; of tongue, 113; plea for more local operation in early breast, 141; of bronchus; investigation into incidence and pathological features of 131 cases from Glasgow Royal Infirmary, 141; anatomicopathological considerations on 5 cases of associated pulmonary, and tuberculosis, 142; primary, of liver in Bantu races of South Africa, 157; primary, of lung; roentgenological study of 206 proved cases, 200; radiation therapy of, of skin; analysis of 83 lesions in 70 patients, 204; treatment of large protruding, of skin and lip irradiation and surgery, 204; supplementary x-ray treatment for, of cervix uteri in relation to direction of spread of disease, 205; healing process in uterine, following irradiation according to Stockholm method, 205; of nasopharynx, 228; of larynx; analysis of 250 operative cases, 228; selection of treatment for, of larynx, 228; anatomicopathological diagnosis of bronchopulmonary, 239; surgical treatment of, of esophagus, 242; of esophagus and results of surgical treatment, 244; transpleural esophagogastrostomy for, of esophagus and for, of cardiac portion of stomach, 251; of stomach in young subjects, 252; small carcinomatous gastric lesions simulating chronic benign ulcer; differential diagnosis and treatment, 252; perforation as complication of gastric, 253; prognosis in, of rectum, 256; early histological diagnosis of pavement-epithelium, of portio, 262; pre-operative irradiation in, of breast; histological study, 305; double radium-mold treatment of, of floor of mouth and lower alveolus, 306; preliminary report on use of fast neutrons in treatment of malignant disease, 306; carcinogenic potency of stilbestrol and estrone in strain C_3H mice, 309; intestinal, and other lesions in mice following oral administration of 1,2,5,6-dibenzanthracene and 20-methylcholanthrene, 310; total laryngectomy in three stages, 328; of rectum and sigmoid, 350; some problems associated with, of cervix, 356; finer cell structure in, of uterine body, 356; investigations on histological structure and cell structures of secondary ovarian, clinical observations, 357; primary, of fallopian tube, 358; of vulva, 359; of vulva, 359; treatment of, of lip and mouth, 410; endogenic blastogenic substances, 412; examination of human tissue for carcinogenic factors, 413; radium treatment of more advanced forms, of, of buccal mucosa, 434; of thyroid, 435; radiation therapy for, of larynx; observations after twenty years, 436; pre-operative radiotherapy of, of breast, 454; symposium on, of lung, 455; esophagotracheal fistula due to, of esophagus, 457; of rectum, 469; clinical features of primary, of liver in Bantu races of South Africa, 470; clinical studies on irradiation treatment of, of esophagus, 514; of breast, 550; treatment of advanced and recurrent, of breast, 550; roentgen therapy for bronchiogenic, 554; hematemesis from peptic ulcer—case for operation; chronic gastric ulcer, chronic duodenal ulcer, gastrostaxis, of

stomach, 558; surgical aids to intracavitary treatment and study of, of stomach, 559; of pancreas, 565; radium treatment of, of penis, 586; importance of transurethral resection of, of prostatic gland performed according to McCarthy, 588; joint radiology committee of medical research council and British Empire Campaign against, medical uses of radium, 608; heredity of malignant tumors, 612; precancer and carcinogenesis, 613. *See also* Malignancy, Tumors, and names of organs
Carbon dioxide, Administration of, for induction and acceleration of labor, 571
Carcinoid of bowel, 468
Carcinomatosis of nasal mucous membrane (fatal hemorrhage after puncture of maxillary sinus), 112
Cardiospasm, Operative treatment of, 466
Carotid gland, Tumors of, 434
Carrere's method, Cholecystographic study of gall bladder according to, and its clinical and operative applications, 563
Cartilage, Histological studies of cases of operated fractures of femoral neck; phenomena occurring in bone and, following bone necrosis, 283
Casein, Parenteral replacement of protein with amino-acids of hydrolyzed, 193
Castration, Excretion of estrogenic and androgenic substances in urine of women: investigation of 14 healthy women, 10 cases of myoma, and 2 of, 165
Catgut, Comparative study of silk and, as materials for suture and ligation, 604
Cell, Finer structure of, in carcinoma of uterine body, 356; investigations on histological structure and structures of, of secondary ovarian carcinomas; clinical observations, 357
Cerebrospinal fluid, Postoperative conditions of lowered intracranial pressure in brain operations; pathological physiology of system of, 441
Cervix, Some problems associated with carcinoma of, 356
Cesarean section, Critical analysis of, in large municipal hospital, 62; use of, as obstetrical method of treatment in Helsinki Woman's Clinic, 370
Chancroid, Treatment of, with sulfanilamide, 174
Chemotherapy, In non-specific infections of urinary tract, 378; of abdominal actinomycosis, 566
Chest, *See* Thorax
Chlorides, Chemical pathology of burns; collective review, 390
Cholecystectomy, Stricture of common duct following, 52; question of drainage following, 352; postcholecystectomy syndrome, 353
Cholecystitis, Management of acute, 51; gastric secretory function in, 157; surgical treatment of acute, 256; studies relating to pathogenesis of, cholelithiasis, and acute pancreatitis, 351; safety factors in surgery of biliary tract; principles of surgical practice, 521
Choledochus, *See* Bile duct
Cholelithiasis, Studies relating to pathogenesis of cholecystitis, acute pancreatitis, and, 351
Chorio-epithelioma, Study of case of ectopic, 266
Circulation, Artificial collateral, to heart; some critical comments on its value, 142; changes in bones and joints resulting from interruption of, general considerations and changes resulting from injuries, 175; changes in bones and joints resulting from interruption of, non-traumatic lesions in adults with bone infarction; arthritis deformans, 484
Claw-foot, Treatment of, 280
Club-foot, Anterior tibial tendon transposition in recurrent congenital, 181; congenital equinovarus, 380
Colitis, Surgical problems in treatment of chronic ulcerative; 47; discussion on surgical treatment of idiopathic ulcerative, and its sequelæ, 47; surgical treatment of intractable ulcerative, 468
Collagen, Experiments with tampons and membranes made of, 293
Collapse therapy, Bronchospirography; application to, preliminary report, 238; importance of intrapleural pressure in thoracic surgery; physiological, and clinical considerations; principles of surgical practice, 313
Collective review, Non-tuberculous thoracic empyema; of literature from 1934 to 1939, 17; brain abscess, 118; relief of deafness in otosclerosis by fistulization of labyrinth, 217; chemical pathology of burns, 390; diaphragmatic hernia, 445; gastrojejunocolic fistula, 459; clinical management of renal trauma, 573
Colles fracture of lower end of radius, 491
Colon, Gangrene of sigmoid flexure of, due to volvulus; recovery of child; spontaneous anastomosis between descending colon and rectum, 49; some etiological and pathological factors in cancer of large bowel, 49; malignant disease of, pre-operative preparation and post-operative care, 81; diverticulitis of, surgical complications, 151; megacolon (Hirschsprung's disease), association with changes in fundus oculi and hydrocephalus, 350; gastrojejunocolic fistula; collective review, 459; physiopathology of, studies by new method, 562
Common duct, *See* Bile duct
Connective tissue, Sarcoma of muscles and spaces of, of limbs, 69
Contamination, Delayed closure of wounds, 196
Contracture, Ischemic, of lower extremity, 285
Convulsions and post-convulsive paralysis of otogenic origin; clinical observations and case records, 10
Cornea, Keratoconus relative to effect of prolonged application of pressure, 325; keratoplasty, 541, 543
Corticosterone, Effects of desoxycorticosterone acetate, cortical extract and, on Addison's disease, 268
Cranium, *See* Skull
Cryptorchidism, Endocrine therapy of, impotence, and prostatic obstruction, 66
Cyst, 30 cases of amygdaloid, treated surgically, 12; colloid, of foramen of Monro, successfully treated by operation, 232; diseases or sphenoid sinus, report of case of, of sphenoid sinus, 544
Cystadenolymphomas, Papilliferous, of neck, 115
Cysts, Thyroglossal, and sinuses, 116; etiology of thin-walled thoracic, 246; congenital air, of lung and emphysema from bronchial obstruction in children, 552; giant ovarian, 567. *See also* names of organs

DEAFNESS, Relief of, in otosclerosis by fistulization of labyrinth; collective review, 217
Deaths, Fatal reactions to administration of sulfonamide drugs, 98
Decubitus, Care of back following spinal-cord injuries, 233
Dehydration, Plasma loss in severe, shock, and other conditions as affected by therapy, 411
Desoxycorticosterone acetate, Effects of, corticosterone, cortical extract, and, on Addison's disease, 268
Diabetes, Acute pancreatitis and, 54
Diabetes mellitus, Unusual case of deficiency disease in patient with, 97
Diagnosis, Non-tuberculous thoracic empyema; collective review of literature from 1934 to 1939, 17; roentgenological, of placenta previa, 94; fundamental concepts in endocrine, and therapy, 99; pathological considerations relating to early, and curative surgical treatment of carcinoma of esophagus; principles of surgical practice, 105; study of method of determining urobilin by fluorescence with Zeiss' nephelometer connected with

Pulfrich's photometer, 310; comparative study of estimation of urobilin as urobilinogen by method of Watson and Heilmeyer and by fluorescence, with Zeiss' nephelometer and Pulfrich's photometer, 311; value of pregnandiol excretion in, of pregnancy disorders, 364; gastrojejunocolic fistula; collective review, 459; value of roentgen, in acute abdominal diseases, 506; and roentgen treatment of certain forms of lumbago, 511

Diaphragmatic hernia, Congenital, 342; diagnosis and treatment of various types of, 344; collective review, 445

Diathermy, Treatment of chronic mastitis; definitions, effects of pregnancy, estrogens, androgens, and, summary and conclusions, 236

Dibenzanthracene, Intestinal carcinoma and other lesions in mice following oral administration of 1, 2, 5, 6, dibenzanthracene and 20-methylcholanthrene, 310

Diet, Protection of liver from injury, 51; effect of salt-poor, during pregnancy upon duration of labor, 265; clinical studies on Vitamin A deficiency; biophotometer and adaptometer (Hecht) studies on normal adults and on persons in whom attempt was made to produce Vitamin A deficiency, 308; recent studies of factors involved in coagulation of blood, including review of Vitamin K; surgery and basic sciences, 417

Dilatation, Significance of manual, in treatment of functional soft part impediments to delivery, 571

Dislocation, Recurrent, of shoulder; coracoglenoid osteoplastic bridge; operation of Ricardo Finochietto, 182; fractures and, of cervical vertebræ, 184; and fracture-dislocations of talus, 184; results of our treatment of congenital hip, 282; grooved defect of humeral head; frequently unrecognized complication of, of shoulder joint, 509; roentgen diagnosis of, of menisci of knee joint without use of contrast media, 513; recurring, of shoulder; operation of Heymanovitch-Nicola; modification of his technique, 594

Diverticulectomy, Vesical, 271

Diverticulitis, Of colon, surgical complications, 151; acute, and sigmoiditis, 560

Diverticulum, Operative technique in treatment of vesical, 171; esophageal, 338; surgical emergencies during childhood caused by Meckel's, 467

Dosage, Specification of, in radium therapy, 609

Dressings, Imperfect sterilization of, as probable cause of postoperative tetanus, 499; prevention and treatment of distant thromboses by elastic adhesive bandages, 499

Drosophila, Practical results of researches on irradiation effect on genes as applied to roentgen therapy and roentgen diagnosis, 608

Ductless glands, Normal and hypertrophied thymus in newborn infants, 169; study of absorption of sex hormones by skin, 519

Ductus arteriosus, Aneurysm of, its importance to thoracic surgeon; report of 2 cases, 143; surgical treatment of subacute streptococcus viridans endarteritis complicating patent, 337

Duodenum, Congenital anomalies of, 44; problem of surgical arrest of massive hemorrhage in ulcer of, 149; deficiency factor in pathogenesis of peptic ulcer, 254; recurrent peptic ulcer, 254; diffuse lipoidosis of, 350; roentgen aspects of gastrogastric and gastroduodenal invagination, 467; treatment of massive gastroduodenal hemorrhage by continuous administration of colloidal aluminum hydroxide; 144 cases, 557; hematemesis from peptic ulcer—case for operation; chronic gastric ulcer, chronic duodenal ulcer, gastrostaxis, carcinoma of stomach, 558

Dura mater, Painful spastic paraplegia by compression of inferior dorsal medulla by dural endothelioma psammomatosa, 440

Dust, Control of air-borne infection in air-raid shelters and elsewhere; bacteriological technique, organisms in coarse droplets, organisms in droplet nuclei, bactericidal mists, how and when to spray, organisms on, 502

Dysphagia with disorders of heart and great vessels, 144

Dystrophy of macula, 325

EAR, Convulsions and postconvulsive paralysis of otogenic origin; clinical observations and case records, 10; treatment of otitis media, 112; relief of deafness in otosclerosis by fistulization of labyrinth; collective review, 217; disturbances of function of, after concussion of brain, 226; tumors of external auditory canal; report of 11 cases, 326

Eclampsia, Clinical and biochemical study, 367; effect of estrogens on true preëclampsia and, 476; edema in preëclampsia and, 571

Edema in preëclampsia and eclampsia, 571

Effusions, Spread of acute intraperitoneal, 472

Ehrlich-Proescher reaction, Method of determining amount of bilirubin in blood; total, direct, and indirect; photometer of Pulfrich and, 208

Elastic, Traction with, in fractures, 281

Elastosis, Contracture of bladder; of bladder, 171

Elbow, Autoplastic articular reconstruction of balancing, 278

Embolism, Erythrocytic-sedimentation reaction in cases of thrombosis, cerebral hemorrhage, and, as well as in some other vascular diseases, 85; pulmonary, and infarction, 98; experimental research on fat, 207; tumor, of common femoral artery treated by embolectomy and heparin, 288; venographic study of thromboembolic problems, 495; postoperative thrombosis and, 499; thrombosis and, in gynecology, 569; peripheral arterial, 598

Embryo, Question of injury of, caused by x-rays, 608

Embryoma of testis, 276

Emphysema, Experimental production of pulmonary, 552; congenital air cysts of lung and, from bronchial obstruction in children, 552

Empyema, Non-tuberculous thoracic, collective review of literature from 1934 to 1939, 17; causes of failure of lung expansion following thoracotomy for acute postpneumonic, 40; importance of intrapleural pressure in thoracic surgery; physiological and clinical considerations; principles of surgical practice, 313

Endarteritis, Experiences in surgical treatment of subacute streptococcus viridans, complicating patent ductus arteriosus, 337

Endocarditis, Puerperal recrudescence of, gangrene of extremities, 266

Endocrine therapy of cryptorchidism, impotence, and prostatic obstruction, 66

Endometriosis, 474

Ephedrine, Action of, and adrenaline in acute pancreatitis, 565

Epidermoidomas, Cranial and intracranial, from roentgenological viewpoint, 440

Epididymis, Spermatocele, 274

Epinephrine, Non-oxidizing, to prolong spinal anesthesia with subarachnoid capacity control, 407

Esophagus, Pathological considerations relating to early diagnosis and curative surgical treatment of carcinoma of, principles of surgical practice, 105; diseases of, esophagoscopic considerations, 240; surgical considerations of achalasia; review of literature and report of 3 cases, 241; congenital atresia of, 32 cases, 242; bleed-

ing varices of; evaluation of methods directed toward their control, especially by direct injection of sclerosing solution, 242; surgical treatment of carcinoma of, 242; carcinoma of, and results of surgical treatment, 244; transpleural esophagogastrostomy for carcinoma of, and for carcinoma of cardiac portion of stomach, 251; roentgen demonstration of varices of, its clinical importance, 338; diverticula of, 338; diaphragmatic hernia; collective review, 445; fistula of, and trachea due to carcinoma of, 457; operative treatment of cardiospasm, 466; clinical studies on irradiation treatment of cancer of, 514; conservative treatment of achalasia, 555; pulmonary abscess following megaesophagus, operated in one stage after creation of artificial pleural symphysis; cure, 556

Estrogens, Testicular tumors in mice receiving, 103; excretion of, and androgenic substances in urine of women; investigation of 14 healthy women, 10 cases of myoma, and 2 of castration, 165; treatment of chronic mastitis; definitions, effects of pregnancy, androgens, diathermy, and, summary and conclusions, 236; effect of, on true preëclampsia and eclampsia, 476

Estrone, Carcinogenic potency of stilbestrol and, in strain C_3H mice, 309

Ether, Effects of anesthesia with, on anaphylaxis, 90; studies with ethyl normal propyl, 503

Exophthalmos, Experimental, and associated myopathy induced by thyrotropic extract, 542

Experiment, Shock produced by, 193

Explosive, Blast from high, report on 10 fatal cases; identification and estimation of carboxyhemoglobin in formol-fixed material, 403

Eye, Some cases of traumatic myopia, 9; chamber angle; gonioscopy, 111; initial lesions of macula observed with sodium light, 111; experience at casualty clearing station; operative procedure; wounds of chest and abdomen; wounds of head and, burns; anesthesia, 195; transcranial extirpation of fibrohemangioma of orbit; report of case, 323; use of retrobulbar proctocaine anesthesia for relief of intractable ocular pain, 324; keratoconus relative to effect of prolonged application of pressure, 325; dystrophies of macula, 325; effect of stimuli on caliber of retinal blood vessels, 326; megacolon (Hirschsprung's disease), association with changes in fundus oculi and hydrocephalus, 350; localization of intra-ocular foreign bodies with contact lens, 409; pilot fitness, safety factor in aviation, 431; tendon transplantation for paralysis of external rectus muscle, 432; evolution of lens lesions in perforations and ruptures of, 432; visual-field defects associated with cerebellar tumors, 432; experimental exophthalmos and associated myopathy induced by thyrotropic extract, 542; keratoplasty, 543, 543

FACE, Fistulas of, of dental origin, 113; origin and nature of certain malformations of head, foot, and, 323; corrective surgery of nasal tip, 433; surgical treatment of gunshot wounds of, and maxillary region, 600

Fallopian tube, Malignant vascular tumors of, and ovary, 58; primary carcinoma of, 59; primary cancer of, 358

Fascia, Repair of inguinal hernias with, 248

Fat, Experimental research on embolism due to, 207; development of lymph nodes in, 389

Femur, Fractures of neck of, in childhood, 77; surgical management of hernia in, and its late results, 248; hernias of, study of 238 hernias and 226 repairs, 249; bifurcation operation, 279; histological studies of operated fractures of neck of, phenomena occurring in bone and cartilage following bone necrosis, 283; operative treatment of certain types of arthritis deformans of hip joint; problem of drilling head of, and arthrodesis, 490; fracture of neck of, pros and cons of nailing, 595

Fetus, Frequency of malformations of, with placenta previa, 365

Fibrinogen, Factors involved in coagulation of blood; review of Vitamin K; surgery and basic sciences, 417

Fibrohemangioma, Transcranial extirpation of, of orbit; report of case, 323

Fibromas of nasopharynx, 115

Fibromyoma, Case of intraligamentary bladder complicating retrocervical, 261

Fingers, Vitallium-cap arthroplasty of metacarpophalangeal and interphalangeal joints of, 279

Finochietto operation, Recurrent dislocation of shoulder; coracoglenoid osteoplastic bridge, 182

Fistula, Pedicled muscle flap in treatment of bronchial, 40; anatomical and physiological effects of arteriovenous, 79; facial, of dental origin, 113; surgical treatment of anorectal, 153; clinical and experimental observations on arteriovenous, 287; esophagotracheal, due to carcinoma of esophagus, 457; gastrojejunocolic, collective review, 459; vesicovaginal, in women, 474; suprapubic transvesical repair of vesicovaginal, 567

Fluid, Salt, and nutritional balance in patients with intestinal suction drainage, 255

Foot, Treatment of claw-foot, 280; experiences with Pirogow amputation of, 286; normal bone angles and roentgen report, 303; origin and nature of certain malformations of face, head, and, 323; congenital equinovarus, 380; disorders of, in military service, 380; review of 111 cases of fracture of calcaneus; injury of talocalcaneal joint, 492; results of treatment in more severe fractures of os calcis, 493

Forearm, Treatment of complete fractures of both bones of, 382

Foreign bodies, Traumatic hemothorax; response of pleura to blood; treatment; infected hemothorax and, reëxpansion of lung, 335; localization of intra-ocular, with contact lens, 409

Fracture, Experimental studies on osteogenesis and biochemistry of callus after, 76; of neck of femur in childhood, 77; of head and neck of radius, 183; and dislocation of cervical vertebræ, 184; dislocations and dislocations with, of talus, 184; elastic-band traction of, 281; unexpected discoveries with regard to planes of torsion, 282; histological studies of cases of operated, of femoral neck; phenomena occurring in bone and cartilage following bone necrosis, 283; sulfanilamide and internal fixation in treatment of compound, 296; gunshot, of long bones in vicinity of joints, 381; treatment of complete, of both bones of forearm, 382; statistical studies of leg during 1933 and 1934, 382; failures following open reduction of fresh, and their lessons, 383; treatment of compound, in war; experience in Spanish Civil War, 404; skull, and management, 429; of apparently healthy bone without true accident, 491; conservative treatment of, of humerus, 491; of shaft of radius and ulna, 491; of lower end of radius (Colles), 491; of external tibial condyle, 492; review of 111 cases of, of calcaneus; injury of talocalcaneal joint, 492; results of treatment in more severe, of os calcis, 493; surgical experiences with B.E.F., 500; surgical approach to proximal end of radius and its use in fracture of head and neck of radius, 591; of neck of femur; pros and cons of nailing, 595; isolated, of tibia, 595

Freezing, Method for removal of areas of brain following, *in situ*, 330

Frost, Treatment of acute injuries from, 294

GALACTOSE, Some aspects of liver; surgery and basic sciences, 209
Gall bladder, Management of acute cholecystitis, 51; stricture of common duct following cholecystectomy, 52; surgical management of usual extrahepatic biliary lesions, 53; gastric secretory function in cholecystitis, 157; surgical treatment of acute cholecystitis, 256; pathogenesis of cholecystitis, cholelithiasis, and acute pancreatitis, 351; question of drainage following cholecystectomy, 352; postcholecystectomy syndrome, 353; safety factors in surgery of biliary tract; principles of surgical practice, 521; cholecystographic study of, according to Carrere's method; clinical and operative applications, 563
Gamma rays, Radiation therapy for carcinoma of larynx; observations after twenty years, 436
Ganglion, Extirpation of stellate, 235
Gangrene, Of sigmoid flexure of colon due to volvulus; recovery of child; spontaneous anastomosis between descending colon and rectum, 49; ligation of femoral and subclavian veins as method of treatment of, of extremities, 79; puerperal recrudescence of endocarditis; of extremities, 266; prevention of ischemic, following surgical operations upon major peripheral arteries by chemical section of cervicodorsal and lumbar sympathetics, 385; latent phlebitis as cause of, 495; amebiasis of skin; etiology of so-called postoperatively progressing, of skin, 515
Gas gangrene, Treatment of, experimentally produced, 600
Gastrectomy, Partial, for peptic ulcer, 146; technique for total, 147; its results, 560
Gastro-intestinal tract, Operative anastomoses between biliary tract and, review of earlier literature and clinical study of 809 Swedish cases, 154; surgical emergencies during childhood caused by Meckel's diverticulum, 467; bleeding lesions of, and their roentgenological diagnosis, 606
Gastroscope, Effect of inflation of stomach upon picture with, 249
Gastroscopy, Indications for, 348
General anesthesia, Technique for, in surgery of mouth, 197
Genital organs (female), Results of surgical interventions on sympathetic nervous system in benign gynecological diseases, 59; experimental investigations on interchange of sex hormones in parabiosis; quantity of hormones necessary for interchange, 101; experiences with hormone of pregnant-mare serum, 102; androgenic therapy in gynecological practice, 164; stilbestrol; clinical and experimental studies, 164; cause and present therapeutic foundations of human sterility, 165; roentgen and tomographic exploration of, with small pneumoperitoneum and pneumocystography, 203; inversion of uterus, 260; theca-cell tumors, 262; artificial vagina, 263; Lipschuetz disease—ulcus vulvæ acutum, 263; result of operation in genital prolapse, 360; importance of histamine metabolism in pregnant and non-pregnant female organism, 360; clinical experiences with equine gonadotropic hormone, 361; vesicovaginal fistulas in women, 474; endometriosis, 474; giant ovarian cysts, 567; governing of reproductive processes by sex hormones in female, 568
Genital organs (male), Experimental investigations on interchange of sex hormones in parabiosis; quantity of hormones necessary for interchange, 101; experimental investigations on interchange of sex hormones in parabiosis; effect of transplanting testes, 101; evaluation of colorimetric and biological method for determining urinary androgens, 102; testicular tumors in mice receiving estrogens, 103; cause and present therapeutic foundations of human sterility, 165; spontaneous hemorrhage of hypertrophied prostate, 172; viability of testis following complete severance of spermatic cord, 172; treatment of impotence by male sex hormone, 173; present stand of treatment of prostatic hypertrophy, 272; perineal prostatectomy, 273; spermatocele, 274; ectopic testis; case of bilateral ectopia testis pelvicis and its surgical correction, 275; embryoma of testis, 276; malignant mixed tumor of spermatic cord (lipo-osteofibrosarcoma), 276; urinary excretion of androgens by patients with benign hypertrophy of prostate, 375; treatment of prostatic obstruction, 376; torsion of appendix testis, 376; end-results of injection treatment of hydrocele, 377; malignant testis tumors; syndrome of choriogenic gynecomastia, 377; hormone treatment of hypertrophy of prostate, 588; importance of transurethral resection of cancer of prostatic gland performed according to McCarthy, 588
Glucose, Intraperitoneal use of hypertonic solution of, 150; fate of ingested solutions of various concentrations of, at different levels of small intestine, 401
Goiter, Medical management of diseases of thyroid gland, 12; malignant, 328; struma lymphomatosa, 545
Gonioscopy, Chamber angle, 111
Gonococcus, Sulfamethylthiazole and sulfathiazole therapy of infections with, 67
Gonorrhea, Treatment with sulfathiazole of urethritis in male due to, 374; late results of arthritis from, 505
Grawitz tumor, Amyloidosis induced by, of kidney, 68
Gynecology, Advances and innovations in fields of obstetrics and, during past twenty years, 160; evaluation of androgenic therapy in practice of, 164; thrombosis and embolism in, 569
Gynecomastia, Studies in malignant testis tumors; syndrome of choriogenic, 377

HAND, Immediate repair of flexor tendons, 194; endarterial injection of mercurochrome in infections of, 295; tuberculous tenosynovitis, 412
Head, Management of acute craniocerebral injuries, 139; experience at casualty clearing station; operative procedure; wounds of, and eyes; burns, anesthesia, 195; experimental studies on headache; pain-sensitive structures of, and their significance in headache, 230; removal of longitudinal sinus involved in tumors, 322; origin and nature in certain malformations of face, foot, and, 323; severe hemorrhage from, and neck, 327; injuries of, 437
Headache, Experimental studies on, pain-sensitive structures of head and their significance in, 230
Heart, Wounds of, and pericardium, 40; artificial collateral circulation to, critical comments on its value, 142; dysphagia with disorders of, and great vessels, 144; non-penetrating injuries of, 240; extrinsic lesions of, 336; roentgen kymographic evaluation of size and function of, 505; total thyroidectomy for disease of, 555
Helium, Use of oxygen and oxygen with, with reference to surgery, 82
Hemangioma, Five years' experience with radium treatment of, results and appraisal, 305
Hematemesis, From peptic ulcer; case for operation; chronic gastric ulcer, chronic duodenal ulcer, gastrostaxis, carcinoma of stomach, 558
Hematoma, Cerebellar subdural, in infant two weeks old with secondary hydrocephalus, 232; of vagina and vulva in connection with labor, 368
Hemolysis, Potassium and phosphate content of plasma from stored blood; experiments on amount of, changes in potassium, change in plasma inorganic phosphate,

use of plasma in transfusions, and preservation of plasma after separation, 191
Hemorrhage, Serum and plasma in treatment of, in experimental animals, 84; erythrocytic-sedimentation reaction in cases of embolism, thrombosis, and cerebral, as well as in other vascular diseases, 85; carcinomatosis of nasal mucus membrane (fatal, after puncture of maxillary sinus), 112; subdural, in patients with mental disease, 139; surgical arrest of massive, in duodenal ulcer, 149; spontaneous, of hypertrophied prostate, 172; control of, 326; severe, from head and neck, 327; blast from high explosive; 10 fatal cases; identification and estimation of carboxyhemoglobin in formol-fixed material, 403; blood substitutes in treatment of acute, experimental evaluation; standard conditions, control experiments, plasma and serum, clinical application, 497; extradural, 547; into lungs in cases of death due to trauma, 551; treatment of massive gastroduodenal, by continuous administration of colloidal aluminum hydroxide; report of 144 cases, 557
Hemostasis, 308; clinical and experimental contribution to study of renal, by interposition of tissues, 586
Hemothorax, Traumatic, response of pleura to blood; treatment; infected, and foreign bodies; re-expansion of lung, 335
Heparin, Tumor embolism of common femoral artery treated by embolectomy and, 288
Hepatitis, Toxic, due to sulfanilamide, 563
Hermaphroditism, Operative treatment of true, new technique for curing hypospadias, 173
Hernias, Incomplete indirect inguinal, study of 2,462, and 2,337 repairs of, 42; fallacy of conjoined tendon; etiology and repair of inguinal, 145; direct inguinal, study of 605, as well as of 565 repairs, 247; fascial repair of inguinal, 248; surgical management of femoral, and its late results, 248; femoral, study of 238, as well as of 226 repairs, 249; congenital diaphragmatic, 342; diagnosis and treatment of various types of diaphragmatic, 344; recurrent inguinal, study of 282, and 268 repairs, 346; diaphragmatic, collective review, 445
Heymanovitch-Nicola operation, Recurring dislocation of shoulder; modification of technique of, 594
Hip, Bifurcation operation, 279; results of our treatment of congenital luxation of, 282; Legg-Perthes disease of, its early roentgenographic manifestations and its cyclical course, 370; operative treatment of certain types of arthritis deformans of, drilling femoral head and arthrodesis, 490
Hippuric-acid test, Some aspects of liver; surgery and basic sciences, 209
Hirschsprung's disease, Megacolon, association with changes in fundus oculi and hydrocephalus, 350
Histamine, Importance of metabolism of, in pregnant and non-pregnant female organism, 360
Holmgren, Relief of deafness in otosclerosis by fistulization of labyrinth; collective review, 217
Hormones, Fundamental concepts in endocrine diagnosis and therapy, 99; growth, in treatment of infantile hypopituitarism with delayed growth, 99; studies of hypophysis transplants, 100; effect of fresh and experimentally modified anterior lobe of hypophysis of cattle on mitotic activity in adrenal cortex of guinea pig, 101; experimental investigations on interchange of sex, in parabiosis; effect of transplanting testes, 101; experimental investigations on interchange of sex, in parabiosis; quantity of, necessary for interchange, 101; further experiences with, of pregnant-mare serum, 102; evaluation of colorimetric and biological method for determining urinary androgens, 102; testicular tumors in mice receiving estrogens, 103; studies on detoxicating, of liver (yakriton); difference of urinary elimination of phenolsulfonphthalein injected intravenously in rabbits with different liver power, and influence of yakriton upon it; contribution to usage of yakriton against experimental chromate nephritis, 156; excretion of estrogenic and androgenic substances in urine of women; investigation of 14 healthy women, 10 cases of myoma, and 2 of castration, 165; treatment of impotence by male sex, 173; studies on significance of follicular, in labor, 265; carinogenic potency of stilbestrol and estrone in strain C_3H mice, 309; relation of endocrine function to resistance and immunity; changes in complement and response to vaccinia following alterations in thryoid, adrenal, and pituitary function in rabbit and dog, 311; clinical experiences with equine gonadotropic, 361; action of posterior pituitary extract on human ureteral peristalsis, 373; urinary excretion of androgens by patients with benign hypertrophy of prostate, 375; absorption of sex, by skin, 519; relationship of sex, to infection 520; experimental exophthalmos and associated myopathy induced by thyrotropic extract, 542; governing of reproductive processes by sex, in female, 568; treatment with, of hypertrophy of prostate, 588
Humerus, Conservative treatment of fractures of, 491; grooved defect of head of, frequently unrecognized complication of dislocations involving shoulder joint, 509
Hydatid of Morgagni, Torsion of appendix testis, 376
Hydrocele, End-results following injection treatment of, 377
Hydrocephalus, Cerebellar subdural hematoma in infant two weeks old with secondary, 232; megacolon (Hirschsprung's disease), association with changes in fundus oculi and, 350
Hydronephrosis, Clinical and experimental studies on treatment of acquired, 268; stenosis of ureteropelvic juncture; congenital and acquired, 373
Hyperemesis gravidarum, Pernicious vomiting of pregnancy, 366
Hyperinsulinism, Adenoma of islets of Langerhans with, associated with adenoma of thyroid, 54; tumors of islet cells with, benign, malignant, and questionable, 55; 3 cases of, with hypoglycemia treated by removal of adenomas from pancreas, 157
Hypochloremia, Azotemia and, in peritonitis, 347
Hypoglycemia, Three cases of hyperinsulinism with, treated by removal of adenomas from pancreas, 157; indications and results of pancreatectomy for, 158
Hypophysis, *See* Pituitary Gland
Hypopituitarism, Growth hormone in treatment of infantile, with delayed growth, 99
Hypoproteinemia and study of its relation to surgical problems, 202
Hypospadias, Operative treatment of true hermaphroditism; new technique, 173
Hysterography, External, graphic study of human parturient uterus and effect of various therapeutic agents upon it, 370

ICTERUS, *See* Jaundice
Ilium, Sacro-iliac tuberculosis, 379
Impotence, Endocrine therapy of cryptorchidism, prostatic obstruction, and, 66; treatment of, by male sex hormone, 173
Incision, Transpleural routes of approach, 83
Incontinence, Anal sphincter; plastic operation for partial, 152; method for evaluating stress of urinary, 164

Infarction, Pulmonary embolism and, 98; changes in bones and joints resulting from interruption of circulation; non-traumatic lesions in adults with bone, arthritis deformans, 484

Infection, Non-tuberculous thoracic empyema; collective review, 17; sulfamethylthiazole and sulfathiazole therapy of gonococcal, 67; operative and postoperative, air-borne bacterial contamination, 88; intrathecal administration of tetanus antitoxin, 89; pencillin as chemotherapeutic agent, 89; toxin-antitoxin reactions in experimental tetanus, 103; brain abscess, collective review, 118; treatment of chancroid with sulfanilamide, 174; newer venereal diseases; association and confusion with neoplastic disease, 174; in wounds, 196; serum prophylaxis in tetanus, 197; local use of sulfanilamide in various tissues, 197; intracranial pathways of, from diseases of sphenoid and ethmoid sinuses, 227; defensive rôle of peritoneum and omentum in fight against bacteria; rôle of trauma in development of peritonitis, 247; anthrax of kidney; 2 new personal observations, 269; endarterial injection of mercurochrome in, of hands, 295; use of sulfur-containing compounds, particularly pentothal sodium, in conjunction with sulfapyridine, 296; sulfanilamide and internal fixation in treatment of compound fractures, 296; sulfathiazole; clinical investigations, 297; physiological and serological characteristics of staphylococci of human origin, 310; sulfathiazole, 311; pathological changes following prolonged administration of sulfathiazole and sulfapyridine, 311; relation of endocrine function to resistance and immunity; changes in complement and response to vaccinia following alterations in thyroid, adrenal, and pituitary function in rabbit and dog, 311; experiences in surgical treatment of subacute streptococcus viridans endarteritis complicating patent ductus arteriosus, 337; chemotherapy in nonspecific, of urinary tract, 378; tetanus toxoid immunization in United States Navy, 405; combined immunization with tetanus toxoid and T.A.B.; response to tetanus toxoid and to T.A.B. vaccine—reactions following T.A.B.T., 405; treatment of tetanus and prevention of complications from use of serum both in prophylaxis and in active therapy, 405; sulfathiazole therapy of staphylococcus aureus bacteriemia, 406; relapsing febrile non-suppurative panniculitis, 411; tuberculous tenosynovitis, 412; specific diagnosis and therapy of actinomycosis, 414; actinomycosis of central nervous system; 2 cases, 437; syndrome of abdominal pain and purpura from, in girl of thirteen, 471; recurrence of, after elective operations in cases of healed suppuration in bones and joints, 486; imperfect sterilization of dressings as probable cause of postoperative tetanus, 499; control of air-borne, in air-raid shelters and elsewhere; bacteriological technique, organisms in coarse droplets, organisms in droplet nuclei, bactericidal mists, how and when to spray, organisms on dust, 502; amebiasis of skin; etiology of so-called postoperatively progressing gangrene of skin, 515; relationship of sex hormones to, 520; chemotherapy of abdominal actinomycosis, 566; treatment with sulfanilamide preparations at Women's Clinic in Bergen, 568; sulfathiazole; clinical and *in vitro* study of its use in, of urinary tract, 588; sulfanilamide in actinomycosis, 600; treatment of gas gangrene experimentally produced, 600; nature of tetanus toxin, 611; amebiasis cutis, 611. *See also* names of organs

Inflammation, Aspiration biopsy as aid in diagnosis of inflammatory affections of lymph nodes, 599; roentgen irradiation in treatment of, 607; roentgen irradiation of, and its action mechanism, 607

Injection treatment, End-results following, of hydrocele, 377

Intervertebral disc, Protusion of lower lumbar, 331; myeloscopic and myelographic observations in prolapse of posterior portion of, causing sciatica, 511; posterior prolapse of, 592

Intestines, Congenital anomalies of duodenum, 44; surgical problems in treatment of chronic ulcerative colitis, 47; discussion on surgical treatment of idiopathic ulcerative colitis and its sequelæ, 47; gangrene of sigmoid flexure of colon due to volvulus; recovery of child; spontaneous anastomosis between descending colon and rectum, 49; some etiological and pathological factors in cancer of large bowel, 49; malignant disease of colon; pre-operative and postoperative care, 81; studies on absorption of sulfanilamide from large, 98; clinical study of plasma volume in acute obstruction of, 148; cause of death in cases of mechanical obstruction of, confused issues and review of recent literature, 149; obstruction of, evaluation of conservative therapy, 255; fluid, salt, and nutritional balance in patients with suction drainage of, 255; ligation and thrombosis of veins of large, 255; rôle of intubation of, in diagnosis and localization of obstruction of, 299; roentgen-ray examination with Miller-Abbott tube, 299; roentgenological diagnosis of diseases of small, 300; carcinoma of, and other lesions in mice following oral administration of 1, 2, 5, 6-dibenzanthracene and 20-methylcholanthrene, 310; plasma transfusion in experimental obstruction of, 312; salivation in course of occlusion of, 349; end-results of implantation of ureter in, 374; fate of ingested glucose solutions of various concentrations at different levels of small, 401; carcinoid of bowel, 468; surgical treatment of intractable ulcerative colitis, 468; value of diagnostic criteria for choice of therapeutic procedure in management of acute obstruction of, 507; acute diverticulitis and sigmoiditis, 560; physiopathology of colon studied by new method, 562; roentgenological studies of mucosa of normal terminal ileum, 607

Intravenous anesthesia, Modern, 601

Invagination, Roentgen aspects of gastrogastric and gastroduodenal, 467

Iron, Use of artificially produced radioactive elements as tagged atoms in biological research, 103

Ischemia, Morphological changes in nerves of anterior extremities in laboratory animals after experimental, 332; revascularization of kidney with, 372

JAUNDICE, Some aspects of liver; surgery and basic sciences, 209; chemical pathology of burns, collective review, 390; safety factors in surgery of biliary tract; principles of surgical practice, 521

Jaws, Benign and malignant tumors of, 9; some considerations of pathology and treatment of suppurations around angle of mandible, 225; osteomyelitis of, 225; pathogeny and therapy of adamantinomas; new surgical procedure, 541; surgical treatment of gunshot wounds of face and maxillary region, 600

Jejunum, Gastrojejunocolic fistula; collective review of literature, 459

Joints, Roentgen recognition of synovioma, 95; changes in bones and, resulting from interruption of circulation; general considerations and changes resulting from injuries, 175; products of wear and tear in, resorption; synovitis detritica, 176; internal derangements of knee, 177; 2 cases of intra-articular xanthoma of knee, 179; shoulder sprains with lesions of coracoclavicular ligaments, 277; experimental studies of nutritional disturbances of menisci, 278; autoplastic articular

reconstruction of balancing elbow, 278; vitallium-cap arthroplasty of metacarpophalangeal and interphalangeal, of fingers, 279; unexpected discoveries with regard to planes of torsion fractures, 282; results of our treatment of congenital hip luxation, 282; x-ray diagnosis in chronic arthritis, 303; relaxation of pelvic, in pregnancy; pelvic arthropathy of pregnancy, 362; sacro-iliac tuberculosis, 379; Legg-Perthes disease of hip; its early roentgenographic manifestations and its cyclical course, 379; gunshot fractures of long bones in vicinity of, 381; peroneus injury due to trauma of knee ligament, 442; changes in bones and, resulting from interruption of circulation; non-traumatic lesions in adults with bone infarction; arthritis deformans, 484; recurrence of infection after elective operations in cases of healed suppuration in bones and, 486; "uncovertebral," and "arthrosis deformans uncovertebralis; "pathologico-anatomical and roentgenological study, 487; operative treatment of certain types of arthritis deformans of hip; drilling femoral head and arthrodesis, 490; review of 111 cases of fracture of calcaneus, injury of talocalcaneal, 492; grooved defect of humeral head; frequently unrecognized complication of dislocation of shoulder, 509; late results of gonorrheal arthritis, 595. *See also* names of joints, joint conditions, and joint operations.

KERATOCONUS relative to effect of prolonged application of pressure, 325
Keratoplasty, 543, 543
Kidney, Amyloidosis induced by tumors of, 66; usage of yakriton against experimental chromate nephritis, 156; treatment of tumors of, and their results, 170; adenomyosarcoma of, (Wilms tumor); 3 cases, 170; clinical and experimental studies on treatment of acquired hydronephrosis, 268; chronic bilateral pyelonephritis and hypertension, 269; anthrax of; 2 new personal observations, 269; errors of interpretation in retrograde pyelography for diagnosis of tumors of, 270; relationship of benign and malignant hypernephroid tumors of; 77 cases in 12,885 necropsies, 270; surgical correction of horseshoe, 372; revascularization of ischemic, 372; injuries of, 478; roentgenography in injuries of, intravenous urography, 481; stones of, and their analysis, 483; clinical management of trauma to, collective review, 573; mechanism of pyelovenous reflux, 585; conservative surgery in surgical and medical nephropathies, 585; hemostasis of, by interposition of tissues, 586
Knee, Arthrography of, in diagnosis of trauma to menisci, 94; internal derangements of, 177; 2 cases of intra-articular xanthoma of, 179; experimental studies of nutritional disturbances of menisci, 278; peroneus injury due to trauma of ligament of, 442; meniscus lipoma as indirect cause of attrition meniscopathy leading to spontaneous rupture; monographic study concerning tumors of semilunar cartilage of, 488; roentgenographic evidence of meniscal lesions in joint of, 512; roentgen diagnosis of dislocation of menisci of, without use of contrast media, 513; mechanics of ligaments and menisci of, 592

LABOR, Roentgenological study of spontaneous version, 61; obstetrical shock, 61; critical analysis of cesarean section in large municipal hospital, 62; effect of salt-poor diet during pregnancy upon duration of, 265; significance of follicular hormone in, 265; hematomas of vagina and vulva in connection with, 368; effect of Vitamin K administered to patients in, 370; use of cesarean section as obstetrical method of treatment in Helsinki Woman's Clinic, 370; principles of treatment of apoplexia uteroplacentaris, 476; administration of carbon dioxide for induction and acceleration of, 571; significance of manual dilatation in treatment of functional soft-part impediments during delivery, 571
Labyrinth, Relief of deafness in otosclerosis by fistulization of; collective review, 217
Lactation, Calcium, phosphorus and nitrogen metabolism in women during second half of pregnancy and in early, 364
Laryngectomy, Total, in three stages, 328
Laryngocele ventricularis, 116
Larynx, Tuberculosis of, in childhood, 14; laryngocele ventricularis, 116; cancer of; 250 operative cases, 228; selection of treatment for cancer of, 228; radiation therapy for carcinoma of; observations after twenty years, 436
Leg, Amputations of lower extremity, 187; ischemic contracture of lower extremity, 285; statistical studies of fractures of, during 1933 and 1934, 382; fracture of external tibial condyle, 492; isolated fracture of tibia, 595
Legg-Perthes disease, Of hip; its early roentgenographic manifestations and its cyclical course, 379
Lempert, Relief of deafness in otosclerosis by fistulization of labyrinth; collective review, 217
Lens, Localization of intra-ocular foreign bodies with contact lens, 409; evolution of lesions of, in eye perforations and ruptures, 432
Leucocytes, Stored blood; in stored blood, 190; differential count of, 415
Levulose, Some aspects of liver; surgery and basic sciences, 209
Ligaments, Shoulder sprains with lesions of coracoclavicular, 277; mechanics of, and menisci of knee joint, 592
Ligation, Comparative study of silk and catgut as materials for suture and, 604
Limbs, Treatment of war wounds of; experience in 266 cases, 194
Lip, Treatment of large protruding carcinomas of skin and, by irradiation and surgery, 204; treatment of cancer of, and mouth, 410
Lipoidosis, Diffuse, of duodenum, 350
Lipoma, Meniscus, as indirect cause of attrition meniscopathy leading to spontaneous rupture; monographic study concerning tumors of semilunar cartilage of knee, 488; retropharyngeal, 545
Lipschuetz disease, Ulcus vulvæ acutum, 263
Liver, Portal pyemia following acute appendicitis; case of multiple abscesses of, with recovery, 46; protection of, from injury, 51; clinical investigations of some factors causing prothrombin deficiencies; significance of, in their production and correction, 96; metabolism of Vitamin K and rôle of, in production of prothrombin in animals, 96; variations in origin and course of artery of, and its branches, 155; studies on detoxicating hormone of, (yakriton); difference of urinary elimination of phenolsulfonphthalein injected intravenously in rabbits with different liver power, and influence of yakriton upon it, 156; primary carcinoma of, in Bantu races of South Africa, 157; nutritional factors which affect, serum phosphatase and diseases of, function tests of, precipitation and flocculation tests; dye excretion tests; tests of carbohydrate metabolism; mechanical causes of damage of, surgery and basic sciences, 209; chemical pathology of burns; collective review, 390; clinical features of primary carcinoma of, in Bantu races of South Africa, 470; safety factors in surgery of biliary tract; principles

of surgical practice, 521; toxic hepatitis due to sulfanilamide, 563
Ludwig's angina, 10
Lumbago, Diagnosis and roentgen treatment of, 511
Lungs, Experimental study of blast injuries to, 39; effects of high-explosive blasts on, 39; sulfanilamide and experimental tuberculosis in guinea pig, 39; indications for lobectomy and pneumonectomy in tuberculosis of, 40; pedicled muscle flap in treatment of bronchial fistulas, 40; effects of precipitated silica and of iron oxide on incidence of primary tumors of, in mice, 40; causes of failure of expansion of, following thoracotomy for acute postpneumonic empyema, 40; aspiration bronchopneumonia; aspiration of stomach content, 85; embolism of, and infarction, 98; carcinoma of bronchus; incidence and pathological features of 131 cases from Glasgow Royal Infirmary, 141; anatomicopathological considerations on 5 cases of associated pulmonary cancer and tuberculosis, 142; evaluation of pulmonary function tests in determination of risk prior to thoracic surgery, 144; roentgen aspects of non-putrid suppuration of, 200; primary carcinoma of, roentgenological study of 206 proved cases, 200; deleterious effects of deep roentgen irradiation on structure and function of, 204; bronchospirography; description of catheter and technique of intubation, 237; bronchospirography; application to collapse therapy, 238; extrapleural pneumothorax, 238; extrapleural pneumolysis in artificial pneumothorax, 238; treatment of abscesses of, 238; anatomicological diagnosis of bronchopulmonary cancer, 239; pathogenesis of postoperative complications in, 293; importance of intrapleural pressure in thoracic surgery, principles of surgical practice, 313; traumatic hemothorax; response of pleura to blood; treatment; infected hemothorax and foreign bodies; reëxpansion of, 335; abscess of, 335; study of surgical treatment of abscess of, 336; new method for surgical reduction of size of chest; proposal of operation, 342; paravertebral procaine block in treatment of postoperative atelectasis, 402; blast from high explosive; preliminary report on 10 fatal cases; with note on identification and estimation of carboxyhemoglobin in formol-fixed material, 403; anesthesia in chest injuries; physiology, anesthetic methods, intratracheal insufflation, choice of anesthetic agent, administration, conduction of anesthesia, and oxygen therapy, 407; metabolism of oxalic acid in patients with pleuropulmonary suppuration, 454; symposium on carcinoma of, 455; experimental study of fate of remaining, following total pneumonectomy, 457; evaluation and treatment of injuries, by firearms, 501; tuberculosis of bronchial lymph glands, roentgenological investigation, 505; safety factors in surgery of biliary tract; principles of surgical practice, 521; new orientations in treatment of thoracopulmonary injuries, 551; hemorrhage into, in cases of death due to trauma, 551; studies in experimental production of pulmonary emphysema, 552; congenital air cysts of, and emphysema from bronchial obstruction in children, 552; roentgen therapy of experimental lobar pneumonia in dogs, 553; curative action of partial thoracoplasties of apex on purulent effusions resulting from ineffective pneumothorax, 553; origin of tumors occurring in apex of lungs, 554; roentgen therapy for bronchiogenic carcinoma, 554; pulmonary abscess following mega-esophagus, operated in one stage after creation of artificial pleural symphysis; cure, 556
Lymphadenopathy, General abdominal, non-specific mesenteric adenitis, 473
Lymph glands, Tuberculosis of bronchial, roentgenological investigation, 505; aspiration biopsy in diagnosis of inflammatory affections of, 599
Lymph nodes, Development of, in fat, 389
Lymphopathia venerea, Roentgen picture of rectal narrowing in, 507

MACULA, Initial lesions of, observed with sodium light, 111; dystrophies of, 325
Male, Tumors of breast of, 236
Malformation, Origin and nature of certain, of face, head, and foot, 323; frequency of fetal, in conjunction with placenta previa, 365; surgical correction of horseshoe kidney, 372
Malignancy, Vascular tumors of tubes and ovary, 58; carcinomatosis of nasal mucous membrane (fatal hemorrhage after puncture of maxillary sinus), 112; newer venereal diseases; association and confusion with neoplastic disease, 174; use of fast neutrons in treatment of, 306; goiter, 328; endogenic blastogenic substances, 412; heredity of tumors, 612. *See also* Cancer, Tumors, and names of tumors
Mandible, *See* Jaws
Manic depression, Pain of cyclothymic states; case with brachial pain, 611
Marble, Fourteen cases of partial rhinoplasty, prostheses of, 434
Mastectomy, Nature and cause of swelling of upper limb after radical, 334
Mastitis, Treatment of chronic, definitions—effects of pregnancy, estrogens, androgens, diathermy—summary and conclusions, 236; roentgen treatment of early mastitis in puerperium, 333
Mastopathies and benign tumors of breast; treatment, 550
Maxilla, *See* Jaws
Meckel's diverticulum, Surgical emergencies during childhood caused by, 467
Mediastinitis, Acute, 341
Mediastinum, Surgery of tumors of, 244
Medicine, Human serum; its application in, 611
Medulla, Section of spinothalamic tract in, pathway for pain, 547
Megacolon, (Hirschsprung's disease), association with changes in fundus oculi and hydrocephalus, 350
Melanoblastoma, Malignant, of urethra, 375
Melanoma, 518
Meninges, Effect of iodized oil on, of spinal cord and brain, 305
Meniscus, Experimental studies of nutritional disturbances of, 278; lipoma of, as indirect cause of attrition meniscopathy leading to spontaneous rupture; tumors of semilunar cartilage of knee, 488; roentgenographic evidence of lesions of, in knee joint, 512; roentgen diagnosis of dislocation of, of knee joint without use of contrast media, 513; mechanics of ligaments and, of knee joint, 592
Menopause, Concerning 2 cases of theca-cell tumors as cause of postclimacteric bleeding, 358
Meralgia paresthetica, Osteoplastic neurolysis operation for cure of, 442
Mercurochrome, Endarterial injection of, in infections of hands, 295
Mesentery, General abdominal lymphadenopathy, non-specific adenitis of, 473
Metabolism, Of Vitamin K and rôle of liver in production of prothrombin in animals, 96; some aspects of liver; surgery and basic sciences, 209; importance of histamine, in pregnant and non-pregnant female organism, 360; Vitamin C analysis in relation to clinical problems, 402; of oxalic acid in patients with pleuropul-

monary suppuration, 454
Metastases, Regional lymphatic, of carcinoma of rectum, 50; pathological considerations relating to early diagnosis and curative surgical treatment of carcinoma of esophagus; principles of surgical practice, 105; roentgenological aspects of, 203
Methylcholanthrene, Intestinal carcinoma and other lesions in mice following oral administration of 1, 2, 5, 6—dibenzanthracene and 20, 310
Meulengracht, Evaluation of régime of, in treatment of bleeding peptic ulcer, 146
Miller-Abbott tube, Rôle of intestinal intubation in diagnosis and localization of intestinal obstruction, 299; roentgen-ray examination with, 299
Mole, Melanoma, 518
Mouth, Facial fistulas of dental origin, 113; technique for general anesthesia in surgery of, 197; double radium-mold treatment of carcinoma of floor of, and lower alveolus, 306; control of hemorrhage, 326; treatment of cancer of lip and, 410; radium treatment of more advanced forms of cancer of buccal mucosa, 434
Mucosa, Roentgenological studies of, of normal terminal ileum, 607
Mummies, Demonstration of life in tissues of American and Egyptian, 207
Muscle, Skeletal tissue tumor, 68; sarcoma of, and connective-tissue spaces of limbs, 69; new technique for transplantation of trapezius, in isolated paralysis of deltoid, 176; rupture of quadriceps tendon, report of 3 cases, 180
Myeloma, Solitary, of bone; review of roentgenological features, report of 4 cases, 484; multiple, 590
Myoma, And carcinoma of corpus, 57; excretion of estrogenic and androgenic substances in urine of women; investigation of 14 healthy women, 10 cases of, and 2 of castration, 165
Myopia, Some cases of traumatic, 9

NAILING, Fracture of neck of femur; pros and cons of, 595
Nasopharynx, Cancer of, 228
Neck, Treatment of diseases of throat, 11; medical management of diseases of thyroid gland, 12; papilliferous cystadenolymphomas of, 115; thyroglossal cysts and sinuses, 116; lateral aberrant tumors of thyroid gland, 116; laryngocele ventricularis, 116; fractures and dislocation of cervical vertebræ, 184; cancer of larynx; analysis of 250 operative cases, 228; selection of treatment for cancer of larynx, 228; severe hemorrhage from head and, 327; total laryngectomy in three stages, 328; carotid tumors, 434; struma lymphomatosa, 545
Necrosis, Experimental study of pathogenesis of acute, of pancreas, 257; post-partum, of anterior lobe of pituitary gland, 265; histological studies of cases of operated fractures of femoral neck; phenomena occurring in bone and cartilage following bone, 283; review of cases of pancreas, and of chronic pancreatitis and their late results at University Surgical Clinic at Jena during years 1920 to 1937, 471
Neosynephrin hydrochloride, Use of, in maintaining blood pressure during spinal anesthesia, 199
Nephelometer, Study of method of determining urobilin by fluorescence with Zeiss, connected with Pulfrich's photometer, 310
Nephrectomy, Clinical management of renal trauma, collective review, 573
Nephritis, Studies on detoxicating hormone of liver (yakriton); contribution to usage of yakriton against experimental chromate, 156
Nephropathies, Conservative surgery in surgical and medical, 585
Nerves, Is thiamin antineuritic vitamin, 96; frequency of prolapsus disci intervertebralis as cause of sciatica, 140; wounds of peripheral, 234; 3 cases of thrombo-angiitis obliterans treated by resection of splanchnic, 234; extirpation of stellate ganglion, 235; abdominal neoplasms of neurogenic origin, 258; trigeminal neuralgia with demonstrable gross causative lesions; 5 cases, 330; can we improve treatment of wounds of peripheral, 331; morphological changes in, of anterior extremities in laboratory animals after experimental ischemia, 332; osteoplastic neurolysis operation for cure of meralgia paresthetica, 442; peroneus injury due to trauma of knee-joint ligament, 442; bilateral supradiaphragmatic section of splanchnic nerves in surgical treatment of high blood pressure, 443; new surgical treatment for trigeminal neuralgia, 548; results of treatment of wounds of peripheral, gunshot wounds of years 1919, 1927, and 1934, 549
Neuralgia, Trigeminal, with demonstrable gross causative lesions; 5 cases, 330; new surgical treatment for trigeminal, 548
Neurofibromatosis, Some orthopedic relationships of, 596
Neurolysis, Osteoplastic operation for cure of meralgia paresthetica, 442
Neutrons, Preliminary report on use of fast, in treatment of malignant disease, 306
Nevi, Radium treatment of vascular, 513
Newborn, Normal and hypertrophied thymus in, 169; congenital prepyloric membranous obstruction in premature infant, 253
Nicotinic acid, Unusual case of deficiency disease in patient with diabetes mellitus, 97; studies on causation of experimental gastroprival pellagra, 97
Nitrogen, Metabolism of calcium, phosphorus, and, in women during second half of pregnancy and in early lactation, 364
Nose, Carcinomatosis of nasal mucous membrane (fatal hemorrhage after puncture of maxillary sinus), 112; corrective surgery of tip of, 433; 14 cases of partial rhinoplasty; marble prostheses, 434
Nutrition, Trophic syndrome of spina bifida occulta, 233; fluid, salt, and balance of, in patients with intestinal suction drainage, 255; experimental studies of disturbances of, of menisci, 278; hypoproteinemia and its relation to surgical problems, 292; clinically associated deficiency diseases, 411

OBSTETRICS, Advances and innovations in fields of, and gynecology during past twenty years, 160
Omentum, Defensive rôle of peritoneum and, in fight against bacteria; rôle of trauma in development of peritonitis, 247
Operating room, Sterilization of air in, with bactericidal radiation; results from November 1, 1938 to November 1, 1939, safety of patients and personnel, 192
Operation, Pre-operative and postoperative care and post-operative complications in gastric surgery, 81; malignant disease of colon; pre-operative preparation and postoperative care, 81; transpleural routes of approach, 83; surgical treatment of air-raid casualties; 12 cases, 87; postoperative infections; air-borne bacterial contamination, 88; early rising after abdominal and pelvic, 192; parenteral replacement of protein with amino-acids of hydrolyzed casein, 193; structure of blood in relation to surgical problems, 292; hypoproteinemia and its relation to surgical problems, 292; pathogenesis of pulmonary complications after, 293; paravertebral procaine block in treatment of atelectasis after, 402;

thrombosis and embolism after, 499; safety factors in surgery of biliary tract; principles of surgical practice, 521
Orbit, Transcranial extirpation of fibrohemangioma of, report of case, 323
Orthopedic surgery, Anesthesia in, 602
Osteogenesis, Relief of deafness in otosclerosis by fistulization of labyrinth; collective review, 217
Osteoma, Osteoid, further experience with this benign tumor of bone, cases showing lesion in relation to shaft cortices and commonly misclassified as instances of sclerosing non-suppurative osteomyelitis or cortical-bone abscess, 68; cranial, from roentgenological viewpoint, 93
Osteomyelitis, Osteoid-osteoma; further experience with this benign tumor of bone, cases showing lesion in relation to shaft cortices and commonly misclassified as instances of sclerosing non-suppurative, or cortical-bone abscess, 68; discussion of methods of treatment of acute hematogenous, 175; of jaws, 225; treatment, complications, and late results of acute hematogenous, 404; therapy in acute, of frontal bone, 429
Otitis media, Treatment of, 112
Otosclerosis, Relief of deafness in, by fistulization of the labyrinth; collective review, 217
Ovary, Luteinized granulosa-cell tumor, 57; malignant vascular tumors of the tubes and, 58; theca-cell tumors, 262; investigations on histological structure and cell structures of secondary carcinomas of, 357; functional and growth characteristics of struma of, 358; 2 cases of theca-cell tumors as cause of postclimacteric bleeding, 358; ovarian pregnancy, 363; giant cysts of, 567
Ovulation, Clinical experiences with equine gonadotropic hormone, 361
Oxalic acid, Metabolism of, in patients with pleuropulmonary suppuration, 454
Oxygen, Studies on stored blood; capacity of, in stored blood, 80; use of, and oxygen-helium, with reference to surgery, 82; studies on effects of inhalation of high concentration of, in experimental shock, 84

PAIN, Preliminary note on use of retrobulbar proctocaine anesthesia for relief of intractable ocular, 324; syndrome of abdominal, and infectious purpura in girl of thirteen, 471; section of spinothalamic tract in medulla with observations on pathway for, 547; of cyclothymic states; case with brachial, 611
Pancreas, Adenoma of islets of Langerhans with hyperinsulinism, associated with adenoma of thyroid, 54; tumors of islet cells with hyperinsulinism; benign, malignant, and questionable, 55; 3 cases of hyperinsulinism with hypoglycemia treated by removal of adenomas from, 157; experimental study of pathogenesis of acute necrosis of, 257; roentgenology of disease of, Caldwell lecture, 1939, 301; review of cases of necrosis of, and of chronic pancreatitis and their late results at University Surgical Clinic at Jena during years 1920 to 1937, 471; carcinoma of, 565
Pancreatectomy, Indications and results of, for hypoglycemia, 158
Pancreatitis, Acute, and diabetes, 54; studies relating to pathogenesis of cholecystitis, cholelithiasis, and acute, 351; experimental bile, with reference to recovery and to toxicity of hemorrhagic exudate, 564; action of ephedrine and adrenaline in acute, 565
Panniculitis, Contribution on relapsing febrile non-suppurative, 411
Parabiosis, Experimental investigations on interchange of sex hormones in, quantity of hormones necessary for interchange, 101: experimental investigations on interchange of sex hormones in, effect of transplanting testes, 101
Paralysis, Convulsions and post-convulsive, of otogenic origin; clinical observations and case records, 10; new technique for transplantation of trapezius muscle in isolated, of deltoid muscle, 176; tendon transplantation for, of external rectus muscle, with further report, 432
Paraplegia, Painful spastic, by compression of inferior dorsal medulla by dural endothelioma psammomatosa, 440
Parotid gland, Treatment of mixed tumors of, 9; mixed tumors of, 542
Pellagra, Studies on causation of experimental gastroprival, 97
Pelvis, Early rising after operations on abdomen and, 192; relaxation of joints of, in pregnancy; arthropathy of pregnancy, 362; stenosis of ureteropelvic juncture; congenital and acquired, 373
Pencillin as chemotherapeutic agent, 89
Penis, Operative treatment of true hermaphroditism; new technique for curing hypospadias, 173; tumors of, 483; radium treatment of cancer of, 586
Pentothal sodium, Use of sulfur-containing compounds, particularly, in conjunction with sulfapyridine, 296
Pericardium, Wounds of heart and, 40; adherent, constrictive and non-constrictive, 337
Perineum, Prostatectomy through, 273
Peripheral nerves, Wounds of, 234; can we improve treatment of wounds of, 331; peroneus injury due to trauma of knee-joint ligament, 442; results of treatment of wounds of, with consideration of gunshot wounds of years 1919, 1927, and 1934, 549
Peristalsis, Action of posterior pituitary extract on human ureteral, 373; gastric, and solid ingesta; roentgen findings in normal stomach and in stomach after operation, 557
Peritoneum, Defensive rôle of, and omentum in fight against bacteria; rôle of trauma in development of peritonitis, 247
Peritonitis, Puerperal, 63; treatment of appendical, 150; azotemia and hypochloremia in, 347
Pharynx, Ludwig's angina, 10; treatment of diseases of throat, 11; 30 cases of amygdaloid cyst treated surgically, 12; fibromas of nasopharynx, 115; study of tuberculosis of tonsils, 227; cancer of nasopharynx, 228; anatomicopathological studies of retropharyngeal (peripharyngeal) abscess, 545; retropharyngeal lipoma, 545
Phenolsulfonphthalein, Studies on detoxicating hormone of liver (yakriton); difference of urinary elimination of, injected intravenously in rabbits with different liver power, and influence of yakriton upon it; contribution to usage of yakriton against experimental chromate nephritis, 156
Pheochromocytoma of adrenal with paroxysmal hypertension; case relieved by surgery, 478
Phlebitis, Latent, as cause of gangrene, 495
Phosphatase, Some aspects of liver: nutritional factors which affect liver; in serum and diseases of liver, surgery and basic sciences, 209
Phosphate, Potassium and, content of plasma from stored blood; experiments on amount of hemolysis, changes in potassium, change in plasma inorganic, use of plasma in transfusions, and preservation of plasma after separation, 191
Phosphorus, Metabolism of calcium, nitrogen, and, in women during second half of pregnancy and in early lactation, 364

Pirogow amputation, Experience with, of foot, 286
Pituitary gland, Diseases of, 15; growth hormone in treatment of infantile hypopituitarism with delayed growth, 99; clinical and experimental studies of hypophysis transplants, 100; effect of fresh and experimentally modified anterior lobe of, of cattle on mitotic activity in adrenal cortex of guinea pig, 101; post-partum necrosis of anterior lobe of, 265; relation of endocrine function to resistance and immunity; changes in complement and response to vaccinia following alterations in function of thyroid, adrenal, and, in rabbit and dog, 311; action of extract from posterior lobe of, on human ureteral peristalsis, 373; primary adenoma of, and syndrome of cavernous sinus; clinical and anatomical study, 439; 3 cases of Simmonds' syndrome, 517; Simmonds' syndrome, 517
Placenta, Principles of treatment of apoplexia uteroplacentaris, 476; roentgen visualization of, by soft-tissue technique, 570; benign tumors of, 570
Placenta previa, Roentgenological diagnosis of, 94; frequency and therapy of, including local statistics from Finland from 1923 to 1932, and clinical material from Helsinki University Woman's Clinic from 1925 to 1936, 364; frequency of fetal malformations in conjunction with, 365
Plasma, Serum and, in treatment of hemorrhage in experimental animals, 84; clinical study of volume of, in acute intestinal obstruction, 148; potassium and phosphate content of, from stored blood; experiments on amount of hemolysis, changes in potassium, change in plasma inorganic phosphate, use of, in transfusions, and preservation of, after separation, 191; transfusion in experimental intestinal obstruction, 312; chemical pathology of burns, collective review, 390; loss of, in severe dehydration, shock, and other conditions as affected by therapy, 411; blood substitutes in treatment of acute hemorrhage; experimental evaluation; standard conditions, control experiments, serum and, clinical application, 497; concentration and drying of, 497
Plaster-of-Paris, 295
Pleura, Transpleural routes of approach, 83; basal exudates of subphrenic origin, 202; importance of pressure in, in thoracic surgery; physiological and clinical considerations; principles of surgical practice, 313; traumatic hemothorax; response of, to blood; treatment; infected hemothorax and foreign bodies; re-expansion of lung, 335
Pneumocystography, Roentgen and tomographic exploration of female genitalis with small pneumoperitoneum and, 203
Pneumolysis, Extrapleural, in artificial pneumothorax, 238
Pneumonectomy, Experimental study of fate of remaining lung following total, 457
Pneumonia, Roentgen therapy of experimental lobar, in dogs, 553
Pneumoperitoneum, Roentgen and tomographic exploration of female genitalia with small, and pneumocystography, 203
Pneumothorax, Extrapleural, 238; extrapleural pneumolysis in artificial, 238; curative action of partial thoracoplasties of apex on purulent effusions resulting from ineffective, 553
Positions, Etiology and treatment of deflected, critical investigation based upon author's own cases, 367
Potassium, Content of phosphate and, of plasma from stored blood; experiments on amount of hemolysis, changes in, change in plasma inorganic phosphate, use of plasma in transfusions, and preservation of plasma after separation, 191; chemical pathology of burns, collective review, 390
Pregnancy, Roentgenological study of case of spontaneous version, 61; retrodisplacement of uterus in relation to, 167; toxicosis of, a functional problem, 168; visceral tetanus in, and puerperium, 168; treatment of chronic mastitis; definitions—effects of estrogens, androgens, diathermy, and—summary and conclusions, 236; effect of salt-poor diet during, upon duration of labor, 265; importance of histamine metabolism in pregnant and non-pregnant female organism, 360; relaxation of pelvic joints in, pelvic arthropathy of, 362; ovarian, 363; calcium, phosphorus, and nitrogen metabolism in women during second half of, and in early lactation, 364; diagnostic value of pregnandiol excretion in disorders of, 364; frequency and therapy of placenta previa, including local statistics from Finland from 1923 to 1932, and clinical material from Helsinki University Woman's Clinic, from 1925 to 1936, 364; frequency of fetal malformations in conjunction with placenta previa, 365; pernicious vomiting of, 366; eclampsia; clinical and bio-chemical study, 367; etiology and treatment of deflected positions—critical investigation based upon author's own cases, 367; perforation of wall of uterus by child's leg during, 476; effect of estrogens on true preëclampsia and eclampsia, 476; new aspects concerning question of protracted, 570; roentgen visualization of placenta by soft-tissue technique, 570; benign tumors of placenta, 570; edema in preëclampsia and eclampsia, 571
Pregnandiol, Diagnostic value of, excretion in pregnancy disorders, 364
Principles of surgical practice, Pathological considerations relating to early diagnosis and curative surgical treatment of carcinoma of esophagus, 105; importance of intrapleural pressure in thoracic surgery; physiological and clinical considerations, 313; safety factors in surgery of biliary tract, 521
Procaine, Paravertebral block with, in treatment of postoperative atelectasis, 402
Proctocaine, Preliminary note on use of retrobulbar anesthesia with, for relief of intractable ocular pain, 324
Prolapse, Investigation into result of operation in genital, 360
Prophylaxis with serum in tetanus, 197
Prostate gland, Endocrine therapy of cryptorchidism, impotence, and obstruction of, 66; spontaneous hemorrhage of hypertrophied, 172; present stand of treatment of hypertrophy of, 272; urinary excretion of androgens by patients with benign hypertrophy of, 375; treatment of obstruction of, 376; hormone treatment of hypertrophy of, 588; importance of transurethral resection of cancer of, according to McCarthy, 588
Prostatectomy, Perineal, 273
Protein, In serum and wound healing, 98; parenteral replacement of, with amino-acids of hydrolyzed casein, 193; hypoproteinemia and its relation to surgical problems, 292; chemical pathology of burns, collective review, 390
Prothrombin, Studies on, maintenance of constant concentration of prothrombin in normal persons, 96; investigations of factors causing deficiencies in; significance of liver in their production and correction, 96; metabolism of Vitamin K and rôle of liver in production of, in animals, 96; factors involved in coagulation of blood, including review of Vitamin K; surgery and basic sciences, 417; studies on, adsorption of; calculation of concentration, 516
Pruritus ani; etiological factors and treatment in 100 cases, 351
Psammomatosa, Painful spastic paraplegia by compression of inferior dorsal medulla by dural endothelioma, 440

Pseudarthrosis, Some orthopedic relationships of neurofibromatosis, 596
Puerperium, Peritonitis in, 63; visceral tetanus in pregnancy and, 168; inversion of uterus, 260; post-partum necrosis of anterior lobe of pituitary gland, 265; recrudescence of endocarditis in, gangrene of extremities, 266; roentgen treatment of early mastitis in, 333; treatment with sulfanilamide preparations at Women's Clinic in Bergen, 568
Pulfrich photometer, Method of determining amount of bilirubin in blood; total, direct, and indirect; reaction of Ehrlich-Proescher and, 208; study of method of determining urobilin by fluorescence with Zeiss' nephelometer connected with, 310: comparative study of estimation of urobilin as urobilinogen by method of Watson and Heilmeyer and by fluorescence, with Zeiss' nephelometer and, 311
Purpura, Thrombopenia in idiopathic hemorrhagic, 189; syndrome of abdominal pain and infectious purpura in girl of thirteen, 471
Pyelography, Errors of interpretation in retrograde, for diagnosis of renal tumors, 270
Pyelonephritis, Chronic bilateral, and hypertension, 269
Pyemia, Portal, following acute appendicitis, case of multiple liver abscesses with recovery, 46
Pylorus, Gastric acidity before and after operative procedure, rôle of, and antrum, 146

RADIO-ACTIVITY, Use of artificially produced radioactive elements as tagged atoms in biological research, 103
Radium, Cancer of tongue, 113; healing process in uterine carcinoma following irradiation according to Stockholm method, 205; five years' experience with treatment of hemangioma, results, and appraisal with, 305; treatment of carcinoma of floor of mouth and lower alveolus with double mold of, 306; treatment of cancer of lip and mouth, 410; treatment with, of more advanced forms of cancer of buccal mucosa, 434; preoperative radiotherapy of cancer of breast, 454; treatment of vascular nevi, 513; irradiation treatment of cancer of esophagus, 514; surgical aids to intracavitary treatment and study of cancer of stomach, 559; treatment with, of cancer of penis, 586; joint radiology committee of medical research council and British Empire Cancer Campaign: medical uses of, 608; specification of dosage in therapy with, 609
Radius, Fractures of head and neck of, 183; fractures (Colles) of lower end of, 491; fractures of shaft of, and ulna, 491; surgical approach to proximal end of, and its use in fractures of head and neck of, 591
Rectum, Gangrene of sigmoid flexure of colon due to volvulus; recovery of child; spontaneous anastomosis between descending colon and, 49; regional lymphatic metastasis of carcinoma of, 50; surgical treatment of fistulas of anus and, 153; prognosis in carcinoma of, 256; cancer of, and sigmoid, 350; cancer of, 469; roentgen picture of narrowing of, in lymphopathia venerea, 507
Retina, Effect of stimuli on caliber of blood vessels of, 326
Rhinoplasty, 14 cases of partial, marble prostheses, 434
Roentgenography, Study of case of spontaneous version, 61; treatment of tuberculosis of spine; symposium, 70; cranial osteomas from viewpoint of, 93; nature of calcified lesions; with reference to those in spleen, 94; diagnosis with, of placenta previa, 94; arthrography of knee in diagnosis of trauma to menisci, 94; recognition of synovioma, 95; aspects of non-putrid pulmonary suppuration, 200; primary carcinoma of lung; study of 206 proved cases, 200; basal exudates of subphrenic origin, 202; roentgen and tomographic exploration of female genitalia with small pneumoperitoneum and pneumocystography, 203; aspects of metastases, 203; bronchospirography; description of catheter and technique of intubation, 237; bronchospirography; application to collapse therapy, 238; rôle of intestinal intubation in diagnosis and localization of intestinal obstruction, 299; examination with Miller-Abbott tube, 299; diagnosis of diseases of small intestine, 300; pancreatic disease; Caldwell lecture, 1939, 301; in caisson disease of bone, case reports, 303; diagnosis in chronic arthritis, 303; normal bone angles and report of, 303; changes in human spine during life as revealed by, 304; effect of iodized oil on meninges of spinal cord and brain, 305; demonstration of esophageal varices; clinical importance, 338; esophageal diverticula, 338; acute mediastinitis, 341; Legg-Perthes disease of hip; early manifestations and cyclical course, 379; adolescent development of sella turcica and frontal sinus, based on consecutive, 409; localization of intra-ocular foreign bodies with contact lens, 409; roentgen examination of brain abscesses, 437; experimental studies on cerebral arteriography, 438; cranial and intracranial epidermoidomas, 440; extrapleural abscesses, 453; symposium on carcinoma of lung, 455: in renal injuries, intravenous urography, 481; solitary myeloma of bone; review of features, 4 additional cases, 484; changes in bones and joints resulting from interruption of circulation; non-traumatic lesions in adults with bone infarction; arthritis deformans, 484; "uncovertebral joints" and "arthrosis deformans uncovertebralis;" pathologico-anatomical and study by, 487; tuberculosis of bronchial lymph glands, investigation with, 505; kymographic evaluation of size and function of heart, 505; value of diagnosis with, in acute abdominal diseases, 506; value of diagnostic criteria for choice of therapeutic procedure in management of acute intestinal obstruction, 507; of rectal narrowing in lymphopathia venerea, 507; investigation of ureterocele, 508; grooved defect of humeral head; frequently unrecognized complication of dislocations of shoulder joint, 509; myeloscopic and myelographic observations in prolapse of posterior portion of intervertebral disc causing sciatica, 511; evidence of meniscal lesions in knee joint, 512; diagnosis of dislocation of menisci of knee joint without use of contrast media, 513; pulmonary abscess following mega-esophagus, operated in one stage after creation of artificial pleural symphysis; cure, 556; gastric peristalsis and solid ingesta; of normal stomach and after operation, 557; physiopathology of colon studies by new method, 562; cholecystographic study of gall bladder according to Carrere's method; clinical and operative applications, 563; exploration of common bile duct for stone; drainage with *T*-tube and cholangiography, 564; new aspects of protracted pregnancy, 570; of placenta by soft-tissue technique, 570; clinical management of renal trauma, collective review, 573; multiple myeloma, 590; in millionth of second, 605; investigations on intracranial subdural space with view to revealing subdural adhesions by, 605; bleeding lesions of gastro-intestinal tract and diagnosis by, 606; of mucosa of normal terminal ileum, 607; practical results of researches on irradiation effect on genes as applied to roentgen therapy and diagnosis by, 608
Roentgen therapy, Cancer of tongue, 113; treatment of large protruding carcinomas of skin and lip by, and surgery, 204; of carcinoma of skin; analysis of 83 lesions in 70 patients, 204; deleterious effects of deep, on lung structure and function, 204; supplementary, for

carcinoma of cervix uteri in relation to direction of spread of disease, 205; advances in, of tumors of bladder, 206; prevention and, of thromboses, 294; preoperative irradiation in carcinoma of breast; histological study, 305; recent additions to clinical and experimental knowledge of breast conditions, 333; of early mastitis in puerperium, 333; pre-operative, of cancer of breast, 454; cancer of rectum, 469; diagnosis and, of certain forms of lumbago, 511; of experimental lobar pneumonia in dogs, 553; for bronchiogenic carcinoma, 554; in treatment of inflammations, 607; of inflammatory processes and its action mechanism, 607; results of researches on irradiation effect on genes as applied to, and roentgen diagnosis, 608; injury of embryo caused by, 608

SACRUM, Sacro-iliac tuberculosis, 379
Salivary glands, Treatment of tumors of, by radical excision, 431
Salivation in course of intestinal occlusion, 349
Salt, Fluid, and nutritional balance in patients with intestinal suction drainage, 255
Sangostop, Hemostasis, 308
Sarcoma, Of muscles and connective-tissue spaces of limbs, 69; treatment of osteogenic, 277; precancer and carcinogenesis, 613
Sciatica, Frequency of prolapsus disci intervertebralis as cause of sciatica, 140; myelographic and myeloscopic observations in prolapse of posterior portion of intervertebral disc causing, 511
Scoliosis, Non-tuberculous thoracic empyema; collective review of literature from 1934 to 1939, 17; conservative compensation-derotation treatment of, 490; some orthopedic relationships of neurofibromatosis, 596
Scurvy, Experimental human, 97
Sella turcica, Adolescent development of, and frontal sinus, based on consecutive roentgenograms, 409
Serum, And plasma in treatment of hemorrhage in experimental animals, 84; proteins of, and wound healing, 98; further experiences with hormone of, from pregnant-mare, 102; prophylaxis with, in tetanus, 197; some aspects of liver: nutritional factors which affect liver; phosphatase in, and diseases of liver, surgery and basic sciences, 209; transfusions of, in the human being, 290; preparation and use of human, for blood transfusion in shock, 291; treatment of tetanus and prevention of complications from use of, both in prophylaxis and in active therapy, 405; blood substitutes in treatment of acute hemorrhage; experimental evaluation; standard conditions, control experiments, plasma and, clinical application, 497; note on transfusion of reconstituted dried human serum, 497; human, its application in medicine, 611
Shock, Traumatic, surgery and basic sciences, 1; obstetrical, 61; effects of inhalation of high concentration of oxygen in experimental, 84; reduction of mortality from experimental traumatic, with adrenocortical substances, 84; surgical treatment of air-raid casualties; 12 cases, 87; causes and treatment of, 192; experimental, 193; preparation and use of human serum for blood transfusion in, 291; pathogenesis of traumatic, oxidative coefficient of urine and blood in experimental traumatic, 309; plasma loss in severe dehydration, and other conditions as affected by therapy, 411; and blood transfusion, 515
Shoulder, Recurrent dislocation of, coracoglenoid osteoplastic bridge; operation of Ricardo Finochietto, 182; sprains of, with lesions of coracoclavicular ligaments, 277; grooved defect of humeral head; frequently unrecognized complication of dislocations of, 509; recurring dislocation of, operation of Heymanovitch-Nicola; Modification of technique, 594
Sigmoid, Cancer of rectum and, 350
Sigmoiditis, Acute diverticulitis, 560
Silk, Comparative study of, and catgut as materials for suture and ligation, 604
Simmonds' syndrome, 517; Three cases of, 517
Sinus, Carcinomatosis of nasal mucous membrane (fatal hemorrhage after puncture of maxillary), 112; thryoglossal cysts and, 116; intracranial pathways of infection from diseases of sphenoid and ethmoid, 227; removal of longitudinal, involved in tumors, 322; adolescent development of sella turcica and frontal, based on consecutive roentgenograms, 409; primary pituitary adenoma and syndrome of cavernous, clinical and anatomical study, 439; diseases of sphenoid, with report of case of cyst of sphenoid, 544
Skin, Radiation therapy of carcinoma of, analysis of 83 lesions in 70 patients, 204; treatment of large protruding carcinomas of, and lip by irradiation and surgery, 204; amebiasis of, contribution to etiology of so-called postoperatively progressing gangrene of, 515; contribution to study of absorption of sex hormones by, 519; amebiasis cutis, 611
Skull, Cranial osteomas; from roentgenological viewpoint, 93; intracranial pathways of infection from diseases of sphenoid and ethmoid sinuses, 227; adolescent development of sella turcica and frontal sinus, based on consecutive roentgenograms, 409; injuries of, caused by projectiles and craniocerebral wounds, 428; fractures of, and their management, 429; therapy in acute osteomyelitis of frontal bone, 429; primary malignant tumors of temporal bone; report of case, 430; cranial and intracranial epidermoidomas, from roentgenological viewpoint, 440; roentgenological investigations on intracranial subdural space with view to revealing subdural adhesions, 605
Sodium, Chemical pathology of burns, collective review, 390
Sodium light, Initial lesions of macula observed with, 111
Sourdille, Relief of deafness in otosclerosis by fistulization of labyrinth; collective review, 217
Spermatic cord, Viability of testis following complete severance of, 172; malignant mixed tumor of, (lipo-osteofibrosarcoma), 276
Spermatocele, 274
Sphenoid sinus, Diseases of, with report of case of cyst of, 544
Sphincter, Anal, plastic operation for partial incontinence, 152; physiological, of hepatic bile duct, 471
Sphincter of Oddi, Functional insufficiency, 354; anatomicofunctional disturbances of, 354
Spinal anesthesia, Segmental peridural, 91; neurogenic dysfunction of bladder due to, 92; use of neosynephrin hydrochloride in maintaining blood pressure during, 199; non-oxidizing epinephrine to prolong, with subarachnoid capacity control, 407; modern, 601
Spinal cord, Frequency of prolapsus disci intervertebralis as cause of sciatica, 140; care of back following injuries of, 233; trophic syndrome of spina bifida occulta, 233; effect of iodized oil on meninges of, and brain, 305
Spine, Non-tuberculous thoracic empyema; collective review of literature from 1934 to 1939, 17; treatment of tuberculosis of, symposium, 70; frequency of prolapsus disci intervertebralis as cause of sciatica, 140; fractures and dislocation of cervical vertebræ, 184; trophic syndrome of spina bifida occulta, 233; changes in human, during life as revealed by roentgen rays, 304; protrusion of lower lumbar intervertebral discs, 331; "uncovertebral joints" and "arthrosis deformans uncov-

ertebralis"; pathologico-anatomical and roentgenological study, 487; conservative compensation-derotation treatment of scoliosis, 490; diagnosis and roentgen treatment of certain forms of lumbago, 511; myeloscopic and myelographic observations in prolapse of posterior portion of intervertebral disc causing sciatica, 511; posterior prolapse of intervertebral discs, 592
Spleen, Nature of calcified lesions; with reference to those in, 94
Sprains of shoulder with lesions of coracoclavicular ligaments, 277
Sputum, Symposium on carcinoma of lung, 455
Staphylococcus, Physiological and serological characteristics of, of human origin, 310; sulfathiazole therapy of, bacteriemia, 406
Stellate ganglion, Extirpation of, 235
Sterility, Cause and present therapeutic foundations of human, 165
Sterilization, Of air in operating room with bactericidal radiation; results from November 1, 1938 to November 1, 1939; safety of patients and personnel, 192; imperfect, of dressings as probable cause of postoperative tetanus, 499
Stilbestrol, Clinical and experimental studies, 164; carcinogenic potency of, and estrone in strain C_3H mice, 309
Stockholm method, Healing process in uterine carcinoma following irradiation according to, 205
Stomach, Further observations on diagnosis and treatment of lesions of, 43; body build of male ulcer patient, 43; cardial ulcers of, results of operation for apparently inaccessible lesions, 43; pre-operative and postoperative care and postoperative complications in surgery of, 81; aspiration bronchopneumonia; with reference to aspiration of content of, 85; studies on causation of experimental gastroprival pellagra, 97; acidity of, before and after operative procedure, rôle of pylorus and antrum, 146; evaluation of Meulengracht régime in treatment of bleeding peptic ulcer, 146; partial gastrectomy for peptic ulcer, 146; technique for total gastrectomy, 147; secretory function of, in cholecystitis, 157; effect of inflation of, upon gastroscopic picture, 249; microscopic examination of juice of, in secretory changes and in some affections of, 250; transpleural esophagogastrostomy for carcinoma of esophagus and for carcinoma of cardiac portion of, 251; carcinoma of, in young subjects, 252; small carcinomatous lesions of, simulating chronic benign ulcer; differential diagnosis and treatment, 252; perforation as complication of carcinoma of, 253; congenital prepyloric membranous obstruction in premature infant, 253; deficiency factor in pathogenesis of peptic ulcer, 254; recurrent peptic ulcer, 254; bacterial development in human, and its surgical significance, 348; indications for gastroscopy, 348; gastrojejunocolic fistula; collective review, 459; operative treatment of cardiospasm, 466; roentgen aspects of gastrogastric and gastroduodenal invagination, 467; inhibition of gastric secretion in man with urogastrone, 557; peristalsis of, and solid ingesta; roentgen findings in normal, and after operation, 557; treatment of massive gastroduodenal hemorrhage by continuous administration of colloidal aluminum hydroxide; 144 cases, 557; hematemesis from peptic ulcer; chronic ulcer of, chronic duodenal ulcer, gastrostaxis, carcinoma of, 558; surgical aids to intracavitary treatment and study of cancer of, 559; gastrectomy; its results, 560
Streptococcus, Experiences in surgical treatment of subacute endarteritis complicating patent ductus arteriosus, 337
Struma lymphomatosa, 545
Struma ovarii, Functional and growth characteristics of, 358
Sulfamethylthiazole, Therapy of gonococcal infections with sulfathiazole and, 67
Sulfanilamide, And experimental tuberculosis in guinea pig, 39; studies on absorption of, from large intestine, 98; fatal reactions to administration of drugs, 98; treatment of chancroid with, 174; local use of, in various tissues, 197; and internal fixation in treatment of compound fractures, 296; comparative studies on absorption of, 416; toxic hepatitis due to, 563; treatment with preparations of, at Women's Clinic in Bergen, 568; in actinomycosis, 600
Sulfapyridine, Use of sulfur-containing compounds, particularly pentothal sodium, in conjunction with, 296; pathological changes following prolonged administration of sulfathiazole and, 311; anuria due to calculi from, 411
Sulfathiazole, 311; therapy of gonococcal infections with sulfamethylthiazole and, 67; clinical investigations of, 297; pathological changes following prolonged administration of, and sulfapyridine, 311; treatment of gonorrheal urethritis in male with, 374; in therapy of staphylococcus aureus bacteriemia, 406; clinical and *in vitro* study of its use in infections of urinary tract, 588
Sulfur, Use of compounds containing, particularly pentothal sodium, in conjunction with sulfapyridine, 296
Suppuration, Basal exudates of subphrenic origin, 202; pathology and treatment of, around angle of mandible, 225; metabolism of oxalic acid in patients with pleuropulmonary, 454; recurrence of infection after elective operations in cases of healed, in bones and joints, 486
Surgery and basic sciences, Traumatic shock, 1; some aspects of liver; nutritional factors which affect liver; serum phosphatase and diseases of liver; liver function tests; precipitation and flocculation tests; dye excretion tests; tests of carbohydrate metabolism; mechanical causes of liver damage, 209; recent studies of factors involved in coagulation of blood, including review of Vitamin K, 417
Suture, Comparative study of silk and catgut as materials for, and ligation, 604
Sympathectomy, Resection of aorto-iliac junction with double lumbar, in treatment of arteritic thrombosis of aorta, 386
Sympathetic nerves, Results of surgical interventions on, in benign gynecological diseases, 59; 3 cases of thrombo-angiitis obliterans treated by resection of splanchnic nerves, 234; prevention of ischemic gangrene following surgical operations upon major peripheral arteries by chemical section of cervicodorsal and lumbar, 385; bilateral supradiaphragmatic section of splanchnic nerves in surgical treatment of high blood pressure, 443; problem of producing complete and lasting sympathetic denervation of upper extremity by preganglionic section, 443; war tetanus (14 cases observed at Centre Sanitaire Français of Besançon); action of anesthetic injections of, 503
Synovioma, Roentgen recognition of, 95
Synovitis, Products of wear and tear in joints; resorption, 176

TAKATA-ARA test, Some aspects of liver; surgery and basic sciences, 209
Talus, Dislocations and fracture-dislocations of, 184
Tampons, Experiments with, and membranes made of collagen, 293
Tarsus, End-results and treatment of tuberculous disease of ankle and, 185

Tendon, Fallacy of conjoined, etiology and repair of inguinal hernia, 145; rupture of quadriceps, with report of 3 cases, 180; anterior tibial transposition of, in recurrent congenital club-foot, 181; immediate repair of flexor, 194; transplantation of, for paralysis of external rectus muscle, 432
Tenosynovitis, Tuberculous, 412
Testis, Endocrine therapy of cryptorchidism, impotence, and prostatic obstruction, 66; experimental investigations on interchange of sex hormones in parabiosis; effect of transplanting, 101; tumors of, in mice receiving estrogens, 103; viability of, following complete severance of spermatic cord, 172; ectopic, report of case of bilateral ectopia testis pelvicis and its surgical correction, 275; embryoma of, 276; end-results of injection treatment of hydrocele, 377; studies in malignant tumors of, syndrome of chorionic gynecomastia, 377
Tests, Some aspects of liver; liver-function, surgery and basic sciences, 209; safety factors in surgery of biliary tract; principles of surgical practice, 521
Tetanus, Intrathecal administration of antitoxin of, 89; toxin-antitoxin reactions in experimental, 103; visceral, in pregnancy and puerperium, 168; serum prophylaxis in, 197; toxoid immunization in United States Navy, 405; combined immunization with toxoid and T.A.B.; response to toxoid and to T.A.B. vaccine—reactions following T.A.B.T., 405; treatment of, and prevention of complications from use of serum both in prophylaxis and in active therapy, 405; imperfect sterilization of dressings as probable cause of postoperative, 499; war, (14 cases observed at Centre Sanitaire Français of Besançon); action of anesthetic injections of sympathetics, 503; nature of toxin of, 611
Theca-cell, Concerning 2 cases of tumors of, as cause of postclimacteric bleeding, 358
Thiamin, Is, antineuritic vitamin, 96
Thoracoplasty, Curative action of partial, of apex on purulent effusions resulting from ineffective pneumothorax, 553
Thoracotomy, Importance of intrapleural pressure in thoracic surgery; physiological and clinical considerations; principles of surgical practice, 313
Thorax, Non-tuberculous empyema of; collective review, 17; aneurysm of ductus arteriosus, its importance to thoracic surgeon; 2 cases, 143; evaluation of pulmonary function tests in determination of risk prior to surgery of, 144; experience at casualty clearing station; operative procedure; wounds of, and abdomen; wounds of head and eyes; burns; anesthesia, 195; anesthesia in surgery of, 198; etiology of thin-walled cysts of, 246; importance of intrapleural pressure in surgery of, physiological and clinical considerations; principles of surgical practice, 313; emergency treatment of traumatic chest injuries, 334; traumatic hemothorax; response of pleura to blood; treatment; infected hemothorax and foreign bodies; reëxpansion of lung, 335; acute mediastinitis, 341; new method for surgical reduction of size of chest; proposal of operation, 342; some revisions of method of treatment of penetrating wounds of chest, 403; anesthesia in chest injuries; physiology, anesthetic methods, intratracheal insufflation, choice of anesthetic agent, administration, conduction of anesthesia, and oxygen therapy, 407; diaphragmatic hernia; collective review, 445; stab wounds of chest, 453; extrapleural abscesses, 453; evaluation and treatment of lung injuries by firearms, 501; new orientations in treatment of thoracopulmonary injuries, 551; hemorrhage into lungs in cases of death due to trauma, 551; studies in experimental production of pulmonary emphysema, 552; pulmonary abscess following mega-esophagus, operated in one stage after creation of artificial pleural symphysis; cure, 556
Thorotrast, Vascular changes after intravenous injection of thorium dioxide, 78
Throat, Treatment of diseases of, 11
Thrombin, Recent studies of factors involved in coagulation of blood; Vitamin K; surgery and basic sciences, 417
Thrombo-angiitis obliterans, Three cases of, treated by resection of splanchnic nerves, 234
Thrombopenia in idiopathic purpura hemorrhagica, 189
Thromboplastin, Recent studies of factors involved in coagulation of blood; Vitamin K; surgery and basic sciences, 417
Thrombosis, Erythrocytic-sedimentation reaction in cases of embolism, cerebral hemorrhage, and, as well as in some other vascular diseases, 85; ligation and, of veins of large intestines, 255; prevention and roentgen therapy of, 294; resection of aorto-iliac junction with double lumbar sympathectomy in treatment of arteritic, of aorta, 386; venographic study of thrombo-embolic problems, 495; postoperative, and embolism, 499; prevention and treatment of distant, by elastic adhesive bandages, 499; and embolism in gynecology, 569
Thymus, Normal and hypertrophied, in newborn infants, 169
Thyroidectomy, Total, for heart disease, 555
Thyroid gland, Medical management of diseases of, 12; adenoma of islets of Langerhans with hyperinsulinism, associated with adenoma of, 54; lateral aberrant tumors of, 116; relation of endocrine function to resistance and immunity; changes in complement and response to vaccinia following alterations in, function of adrenal, pituitary, and, in rabbit and dog, 311; malignant goiter, 328; carcinoma of, 435
Tibia, Transposition of anterior tendon of, in recurrent congenital club-foot, 181; fracture of external condyle of, 492; isolated fracture of, 595
Tidal drainage, Irrigation and, 67
Tissue culture, Demonstration of life in, of American and Egyptian mummies, 207
Toe, Clinical study of 100 patients subjected to simple exostosectomy for relief of bunion pain, 180; dorsal bunion; its mechanics and operative correction, 181
Tongue, Cancer of, 113
Tonsil, Thirty cases of amygdaloid cyst treated surgically, 12; study of tuberculosis of, 227
Toxemia, Traumatic shock; surgery and basic sciences, 1; experimental bile pancreatitis, recovery and toxicity of hemorrhagic exudate, 564
Toxicosis, Of pregnancy, a functional problem, 168; azotemia and hypochloremia in peritonitis, 347
Toxin, Chemical pathology of burns, collective review, 390; nature of tetanus, 611
Toxoid, Combined immunization with tetanus, and T.A.B.; response to tetanus, and to T.A.B. vaccine—reactions following T.A.B.T., 405
Trachea, Fistula due to carcinoma of esophagus, 457
Traction, With elastic band for fractures, 281
Trauma, Shock from, surgery and basic sciences, 1; experimental study of blast injuries to lungs, 39; effects of high-explosive blasts on lungs, 39; management of acute craniocerebral injuries, 139; changes in bones and joints resulting from interruption of circulation; general considerations and changes resulting from injuries, 175; non-penetrating injuries of heart, 240; treatment of acute frost injuries, 294; local anesthesia and treatment of war injuries, 298; pathogenesis of

shock from, oxidative coefficient of urine and blood in experimental shock from, 309; severe hemorrhage from head and neck, 327; extrinsic lesions of heart, 336; diaphragmatic hernia; collective review, 445; injuries of kidney, 478; roentgenography in renal injuries, intravenous urography, 481; evaluation and treatment of lung injuries by firearms, 501; hemorrhage into lungs in cases of death due to, 551; clinical management of renal, collective review, 573

Trigeminal neuralgia, With demonstrable gross causative lesions; 5 cases, 330; new surgical treatment for, 548

Tuberculosis, Of larynx in childhood, 14; sulfanilamide and experimental, in guinea pig, 39; indications for lobectomy and pneumonectomy in pulmonary, 40; of large long bones of extremities, 69; treatment of, of spine; symposium, 70; anatomicopathological considerations on 5 cases of associated pulmonary cancer and, 142; end-results and treatment of, of ankle and tarsus, 185; study of, of tonsils, 227; extrapleural pneumothorax, 238; importance of intrapleural pressure in thoracic surgery; physiological and clinical considerations; principles of surgical practice, 313; new method for surgical reduction of size of chest; proposal of operation, 342; sacro-iliac, 379; tenosynovitis from, 412; of bronchial lymph glands; roentgenological investigation, 505; bone foci of, 590; aspiration biopsy as aid in diagnosis of inflammatory affections of lymph nodes, 599

Tumors, Benign and malignant, of jaw, 9; treatment of mixed, of parotid gland, 9; effects of precipitated silica and of iron oxide on incidence of primary lung, in mice, 40; of islet cells with hyperinsulinism; benign, malignant, and questionable, 55; luteinized granulosa-cell, 57; malignant vascular, of tubes and ovary, 58; giant-cell, of bone, 68; skeletal muscle tissue, 68; testicular, in mice receiving estrogens, 103; papilliferous cystadenolymphomas of neck, 115; lateral aberrant, of thyroid gland, 116; treatment of, of kidney and their results, 170; treatment of infiltrating, of bladder, 172; advances in roentgen-ray treatment of, of bladder, 206; of male breast, 236; surgery of mediastinal, 244; abdominal neoplasms of neurogenic origin, 258; theca-cell, 262; study of case of ectopic chorio-epithelioma, 266; errors of interpretation in retrograde pyelography for diagnosis of renal, 270; relationship of benign and malignant hypernephroid, of kidney; clinical and pathological study of 77 cases in 12,885 necropsies, 270; malignant mixed tumor of spermatic cord (lipo-osteofibrosarcoma), 276; embolism of, of common femoral artery treated by embolectomy and heparin, 288; removal of longitudinal sinus involved in, 322; of external auditory canal, with report of 11 cases, 326; primary adenocarcinoma of appendix and carcinoid, 350; concerning 2 cases of theca-cell, as cause of postclimacteric bleeding, 358; endogenic blastogenic substances, 412; examination of human tissue for carcinogenic factors, 413; primary malignant, of temporal bone; report of case, 430; treatment of, of salivary glands by radical excision, 431; carotid, 434; endometriosis, 474; of penis, 483; meniscus lipoma as indirect cause of attrition meniscopathy leading to spontaneous rupture; monographic study concerning, of semilunar cartilage of knee, 488; melanoma, 518; pathogeny and therapy of adamantinomas; new surgical procedure, 541; mixed, of parotid gland, 542; mastopathies and benign, of breast; treatment, 550; origin of, occurring in apex of lung, 554; benign, of placenta, 570; heredity of malignant, 612; precancer and carcinogenesis, 613. *See also* names of tumors and organs

ULCER, Diagnosis and treatment of gastric lesions, 43; body build of male patient with, 43; cardial gastric, results of operation for apparently inaccessible lesions, 43; surgical problems in treatment of chronic colitis with, 47; surgical treatment of idiopathic colitis with, and its sequelæ, 47; evaluation of Meulengracht régime in treatment of bleeding peptic, 146; partial gastrectomy for peptic, 146; problem of surgical arrest of massive hemorrhage in duodenal, 149; small carcinomatous gastric lesions simulating chronic benign, differential diagnosis and treatment, 252; on presence of deficiency factor in pathogenesis of peptic, 254; recurrent peptic, 254; gastrojejunocolic fistula; collective review, 459; surgical treatment of intractable, colitis with, 468; hematemesis from peptic, case for operation; chronic gastric, chronic duodenal, gastrostaxis, carcinoma of stomach, 558. *See also* names of organs

Ulna, Fractures of shaft of radius and, 491

Ultraviolet radiation, Sterilization of air in operating room with bactericidal results from November 1, 1938 to November 1, 1939, safety of patients and personnel, 192

Ureter, Retrocaval, report of case with operative correction of defect, 271; action of posterior pituitary extract on human peristalsis of, 373; stenosis of ureteropelvic juncture; congenital and acquired, 373; injury to, due to cystoscopic instrumentation in, 373; end-results of intestinal implantation of, 374

Ureterocele, Roentgen investigation of, 508

Urethra, Malignant melanoblastoma of, 375

Urethritis, Treatment of gonorrheal, in male with sulfathiazole, 374

Urinary tract, Method for evaluating stress of urinary incontinence, 164; retrocaval ureter; report of case with operative correction of defect, 271; injury to ureter due to cystoscopic intra-ureteral instrumentation, 373; end-results of uretero-intestinal implantation, 374; chemotherapy in non-specific infections of, 378; sulfathiazole; clinical and *in vitro* study of its use in infections of, 588; concrements from, 589

Urine, Method for evaluating stress of incontinence of, 164; excretion of estrogenic and androgenic substances in, of women; investigation of 14 healthy women, 10 cases of myoma, and 2 of castration, 165; pathogenesis of traumatic shock; oxidative coefficient of, and blood in experimental traumatic shock, 300; chemical pathology of burns, collective review, 390

Urobilin, Study of method of determining, by fluorescence with Zeiss' nephelometer connected with Pulfrich's photometer, 310; comparative study of estimation of, as urobilinogen by method of Watson and Heilmeyer and by fluorescence, with Zeiss' nephelometer and Pulfrich's photometer, 311

Urobilinogen, Comparative study of estimation of urobilin as, by method of Watson and Heilmeyer and by fluorescence, with Zeiss' nephelometer and Pulfrich's photometer, 311

Urogastrone, Inhibition of gastric secretion in man with urogastrone, 557

Urography, Roentgenography in renal injuries, intravenous, 481; clinical management of renal trauma, collective review, 573

Uterus, Mixed adenocarcinoma and squamous-cell carcinoma of, 57; myoma and carcinoma of corpus, 57; retrodisplacement of, in relation to pregnancy, 167; supplementary x-ray treatment for carcinoma of cervix of, direction of spread of disease, 205; healing process in carcinoma of, following irradiation according to Stockholm method, 205; inversion of, 260; case of intraligamentary bladder complicating retrocervical

fibromyoma, 261; early histological diagnosis of pavement-epithelium carcinoma of portio, 262; problems associated with carcinoma of cervix, 356; finer cell structure in carcinoma of body of, 356; external hysterography; graphic study of human parturient, and effect of various therapeutic agents upon it, 370; perforation of wall of, by child's leg during pregnancy, 476; principles of treatment of apoplexia uteroplacentaris, 476

VACCINE, Combined immunization with tetanus toxoid and T.A.B., response to tetanus toxoid and to T.A.B. vaccine—reactions following use of T.A.B.T., 405

Vaccinia, Relation of endocrine function to resistance and immunity; changes in complement and response to, following alterations in thyroid, adrenal, and pituitary function in rabbit and dog, 311

Vagina, Artificial, 263; study of case of ectopic chorioepithelioma, 266; investigation into result of operation in genital prolapse, 360; hematomas of, and vulva in connection with labor, 368; vesicovaginal fistulas in women, 474; suprapubic transvesical repair of vesicovaginal fistulas, 567

Varices, Surgical treatment of varicose veins, 78; bleeding esophageal, evaluation of methods directed toward their control, especially by direct injection of sclerosing solution, 242; roentgen demonstration of esophageal, its clinical importance, 338

Veins, Surgical treatment of varicose, 78; ligation of femoral and subclavian, as method of treatment of gangrene of extremities, 70; ligation and thrombosis of, of large intestines, 255; clinical and experimental observations on arteriovenous fistulas, 287; latent phlebitis as cause of gangrene, 495; venographic study of thromboembolic problems, 495; mechanism of pyelovenous reflux, 585

Venereal diseases, Newer, association and confusion with neoplastic disease, 174

Vetren, Blood transfusion with employment of, and of infusor, 387

Visual field, Defects of, associated with cerebellar tumors, 432

Vitallium cap, Arthroplasty of metacarpophalangeal and interphalangeal joints of fingers with, 279

Vitamins, Parallel investigations into ascorbic acid (Vitamin C) content in blood plasma and into strength of cutaneous capillaries in healthy children, 79; rapid method of differentiating children with large or small reserves of Vitamin C, 96; clinical investigations of factors causing prothrombin deficiencies; significance of liver in their production and correction, 96; metabolism of Vitamin K and rôle of liver in production of prothrombin in animals, 96; thiamin-antineuritic, 96; unusual case of deficiency disease in patient with diabetes mellitus, 97; experimental human scurvy, 97; studies on causation of experimental gastroprival pellagra, 97; clinical studies on Vitamin A deficiency; biophotometer and adaptometer (Hecht) studies on normal adults and on persons in whom attempt was made to produce Vitamin A deficiency, 308; effect of Vitamin K administered to patients in labor, 370; Vitamin C analysis in relation to clinical problems, 402; clinically associated deficiency diseases, 411; recent studies of factors involved in coagulation of blood, including review of Vitamin K; surgery and basic sciences, 417

Vulva, Lipschuetz disease—acute ulcer of, 263; cancer of, 359; carcinoma of, 359; hematoma of vagina and, in connection with labor, 368

WAR, Late complications of abdominal wounds of, 55; experience in treatment of burns of, 86; surgical treatment of air-raid casualties; 12 cases, 87; treatment of wounds of limbs; experience in 266 cases, 194; treatment of acute frost injuries, 294; plaster-of-Paris, 295; local anesthesia and treatment of injuries in, 298; effects of repeated anoxia on brain, 330; foot disorders in military service, 380; experimental study concerning blood transfusions on field of battle, 388; some revisions of method of treatment of penetrating wounds of chest, 403; treatment of compound fractures in; reports of practical experience in Spanish Civil, 404; vascular surgery in, 404; skull injuries caused by projectiles and craniocerebral wounds, 428; pilot fitness, safety factor in aviation, 431; surgical experiences with B.E.F., 500; evaluation and treatment of lung injuries by firearms, 501; control of air-borne infection in air-raid shelters and elsewhere; bacteriological technique, organisms in coarse droplets, organisms in droplet nuclei, bactericidal mists, how and when to spray, organisms on dust, 502; tetanus in, (14 cases observed at Centre Sanitaire Français of Besançon); action of anesthetic injections of sympathetics, 503; surgical treatment of gunshot wounds of face and maxillary region, 600

Water, Chemical pathology of burns, collective review, 300

Weltman reaction, Some aspects of liver; surgery and basic sciences, 209

Wilms tumor, Adenomyosarcoma of kidney, 3 cases, 170

Wounds, Of heart and pericardium, 40; late complications of abdominal war, 55; experience in treatment of war burns, 86; surgical treatment of air-raid casualties, 12 cases, 87; serum proteins and healing of, 98; treatment of war, of limbs; experience in 266 cases, 194; experience at casualty clearing station; operative procedure; of chest and abdomen; of head and eyes; burns; anesthesia, 195; delayed closure of contaminated, 196; infection of, 196; local use of sulfanilamide in various tissues, 197; more radical treatment of gunshot, of brain, 231; of peripheral nerves, 234; plaster-of-Paris, 295; can we improve treatment of, of peripheral nerves, 331; emergency treatment of traumatic chest injuries, 334; perforating gunshot, of abdomen, 354; failures following open reduction of fresh fractures and their lessons, 383; some revisions of method of treatment of penetrating, of chest, 403; skull injuries caused by projectiles and craniocerebral, 428; stab, of chest, 453; injuries of kidney, 478; surgical experiences with B.E.F., 500; results of treatment of peripheral nerve, gunshot, of years 1919, 1927, and 1934, 549; new orientations in treatment of thoracopulmonary injuries, 551; clinical management of renal trauma; collective review, 573; surgical treatment of gunshot, of face and maxillary region, 600

XANTHOMA, Two cases of intra-articular, of knee joint, 179

YAKRITON, Detoxicating hormone of liver; difference of urinary elimination of phenolsulfonphthalein injected intravenously in rabbits with different liver power and influence of, upon it; against experimental chromate nephritis, 156

ZEISS' nephelometer, Method of determining urobilin by fluorescence with, connected with Pulfrich's photometer, 310; comparative study of estimation of urobilin as urobilinogen by method of Watson and Heilmeyer and by fluorescence, with, and Pulfrich's photometer, 311
